The Belarusian Chamber of Commerce and Industry is pleased to present this brochure – prepared by our partner, the leading international assurance and advisory firm EY – to the international business community.

Our country’s investment attractiveness has grown steadily in recent years, driven by strong improvement in the legal framework and conditions of doing business. Figures published by the World Bank and the International Finance Corporation once again put Belarus among the top three of 50 countries that regularly take part in the “Doing Business” project and have achieved impressive results in creating a favorable regulatory environment for entrepreneurs.

The international business community’s growing interest in Belarus is promoted by the creation of favorable investment conditions along with such traditional advantages as our country’s strategic geographical location, highly qualified workforce, technically advanced enterprises, stable socioeconomic situation and the consistent policy of financial institutions. Evidence of this interest can be seen in the number of foreign business delegations visiting our country, which increases exponentially with each passing year.

In the framework of foreign economic initiatives carried out by the Belarusian Chamber of Commerce and Industry, we provide our foreign partners with the widest possible range of information on the investment climate in Belarus as well as on benefits, preferences and projects under way in the country. “Doing business in Belarus” is designed for this purpose.

The brochure contains the latest information on our country’s economy and business conditions – from aspects of the economic system to the application of corporate, currency, migration and tax law. This publication has already proven popular with our foreign partners, and we hope it will provide the information you need for successful projects in our country and will serve as a handy guide to the Belarusian economy.

Mikhail Myatlikov
Chairman of the Belarusian Chamber of Commerce and Industry
The Ministry of Foreign Affairs of the Republic of Belarus would like to call your attention to this overview, prepared by EY specialists.

The Republic of Belarus has created both guarantees and an effective legal framework for investors. Belarus is party to around 50 agreements providing incentives and mutual protection for investments, which means additional guarantees for investors from the European Union, the CIS, Asia, Latin America and other parts of the world.

The new law on investments that took effect on 24 January 2014 offers still more guarantees for investors.

The country’s competitive advantages include a favorable geopolitical position and engagement in integration processes.

Since the formation of the Customs Union of Belarus, Kazakhstan and Russia as well as Belarus's accession to the Common Economic Space, Belarus's investment attraction has only grown. The legal framework of these integrated entities is based on the World Trade Organization’s approach to ensuring clear and predictable conditions for business. Foreign investors can thus tap the vast potential of three member states with a combined population of 170 million, taking their business to an entirely new level.

We hope that this guide will prove useful for our foreign partners working on projects in the Republic of Belarus.

Aleksander Guryanov
Deputy Minister of Foreign Affairs of the Republic of Belarus
Part of the day-to-day work of the **National Agency of Investment and Privatization** is to provide foreign investors with full and objective information on the country’s investment climate and opportunities. The agency also provides assistance in selecting reliable partners and attractive investment projects in Belarus as well as support at all stages of a project, including post-investment support.

We understand how important it is for decision makers to have accurate and objective information from world-class experts. That is why we are presenting this publication - a survey of business conditions in Belarus prepared by EY, which, in a clear and accessible form, provides expert answers to complex questions of interest for any investor.

This brochure will acquaint you with the country’s competitive advantages, the preferences enjoyed by investors doing business here, and the economic policy of the Belarusian authorities, which has driven reforms to create an attractive business climate and provide guarantees for investors. You will learn about the unique opportunities that Belarus has to offer.

“Doing Business in Belarus” will open up new opportunities for the sustainable development and growth of your business, and the National Agency for Investment and Privatization will do everything in its power to promote your initiatives for the success of investment projects in our country. We are confident that this overview will help you take the first step toward profitable investments and business expansion.

Welcome to Belarus!

**Natalya Nikandrova**  
Director of the National Agency of Investment and Privatization

EY – 14 years of successful work in Belarus

EY’s Minsk office was opened in 2000. Today, EY is the largest international firm in Belarus, providing clients with a full range of professional assurance and advisory services. The Minsk office has a staff of over 200.

In today’s challenging environment, EY retains an unwavering commitment to finding innovative methods of serving clients. Throughout its 14 years in Belarus, EY has helped companies adapt to changing conditions and move forward as the country’s economy, financial markets, laws and regulatory methods develop against a background of increasing global integration.

We hope that this guide to doing business will give you a general idea of the Belarusian market’s opportunities, challenges and prospects.

This brochure, prepared by EY specialists, is designed to provide company executives with an overview of the tax system and accounting methods and of how business is organized and conducted in Belarus. Making decisions on foreign operations is a complicated task requiring thorough knowledge of the business climate in the country along with an understanding that economic conditions and the legal and regulatory framework in Belarus continue to develop in many areas. Company executives should be prepared to hear widely diverging opinions on the situation in Belarus. It is strongly recommended that companies doing business in Belarus or planning to do so obtain up-to-date and detailed information from experienced specialists. This brochure contains information as of 1 May 2014.
Geography
The Republic of Belarus (hereinafter, «Belarus») is situated in the heart of Europe, at the crossroads of trade routes from west to east and north to south. It is crossed by the shortest transport communication lines linking the CIS with Western Europe. Belarus borders on Lithuania and Latvia in the north, on Ukraine in the south, on Russia in the east, and on Poland in the west. Its geographic position is of strategic importance for transport between west and east as well as between north and south. From Minsk, it is 500 km to Warsaw, 700 km to Moscow, 1,060 km to Berlin and 1,300 km to Vienna.

Belarus covers a total area of 207,600 sq. km, stretching 560 km (350 miles) from north to south and 650 km (460 miles) from west to east. It is larger than Austria, Ireland, Portugal and Greece. The country’s capital, Minsk, is on the same latitude as Hamburg and Dublin. Belarus's highest point, Dzerzhinsky Hill (345 m above sea level), is in the Minsk Region. The country's lowest place is the Neman Valley in the Grodno Region (80–90 m above sea level).

Administratively, the territory is divided into six regions.

Climate
Belarus has a moderate continental climate featuring winters with frequent thaws and rainy, warm summers. The average temperature in January is −6°C, and in July it is +18°C. The average annual precipitation is 550–700 mm.

Population
The territory of Belarus is populated by about 9.5 million people. Belarus is a multinational country with an urban population of 70%.

Language
Belarusian and Russian are the official state languages in Belarus. The most common languages for business are Russian, English and German.

Time zone
Belarus is located in the Central European Time Zone: GMT +2. When it is noon in Belarus, it is 11:00 a.m. in Paris, 10:00 a.m. in London, 5:00 a.m. in New York, 2:00 a.m. in Los Angeles and 1:00 p.m. in Moscow. Belarus now stays on summer time year-round, so the time zone in winter shifts to GMT +3.

The table below shows the flight time between Minsk and some major cities of the world as well as the time difference.

Public, republican and other holidays
The following public and main republican holidays are celebrated in Belarus. The holidays marked in bold are officially non-working days in Belarus.

Public holidays:
- Constitution Day – 15 March
- Day of Unity of the Peoples of Belarus and Russia – 2 April
- Victory Day – 9 May
- Day of the State Coat of Arms and Flag of the Republic of Belarus – the second Sunday in May
- Independence Day (Republic Day) – 3 July.

Republican holidays:
- New Year – 1 January
- Day of Defender of the Fatherland and the Armed Forces of the Republic of Belarus – 23 February
- Women’s Day – 8 March
- Labor Day – 1 May
- October Revolution Day – 7 November.

Religious holidays:
- Orthodox Christmas – 7 January
- Easter – by the Orthodox and Catholic calendars
- Radunitsa – by the Orthodox calendar
- Memorial Day – 2 November

If any official public holiday falls on a weekend, usually no extra day of rest is provided. If any of the above holidays falls on a Tuesday or Thursday, the preceding Monday or the following Friday (respectively) is as a rule an official non-working day, while the Saturday nearest to the holiday is a working day.

Foreign institutions in Belarus, such as embassies and consulates, usually enjoy the public holidays of their own countries in addition to Belarusian public holidays.
Belarusian economy
Overview

In the course of the decade preceding 2008, the Belarusian economy grew at an average annual rate of 7.5% due to the country’s reserves and favorable external conditions. High investment-to-GDP ratios and productivity gains due to an increasingly well-educated and disciplined labor force were the main contributors to growth.

Favorable external conditions also promoted the country’s rapid economic development. They included high economic growth rates in Russia and other countries, easy access to the Russian market and low-cost energy imports from Russia. The total assets of the banking sector grew three to four times faster than GDP.

Most of the Belarusian economy remains under state control. Thus, more than half of Belarusians are employed by state-controlled companies, while others are employed mainly by private Belarusian companies, and less than 2% of Belarusians are employed by foreign companies.

Export/Import

Belarus actively imports and exports goods – largely chemicals, machinery and equipment, transport vehicles, ferrous and nonferrous metals, etc.

At the end of 2013, Russia accounted for 35% of the exports and 59% of the imports of Belarus. Statistics show that exports to non-CIS countries have considerably increased recently.

In its imports and exports, Belarus depends on Russia, which is its major trade partner. Russia accounts for 45% of Belarusian foreign trade turnover, followed by its second largest trade partner, the European Union.

Source: National Statistical Committee of the Republic of Belarus.
General economic development trends

Like many other countries, Belarus was engulfed in the financial and economic crisis in 2008. The crisis in Belarus developed according to global trends, but with a few differences. It is generally assumed that the crisis in 2008 did not hit Belarus as hard as it did the neighboring countries. This is largely due to the country’s structural economic indicators, modest foreign borrowing, determination to maintain the level of production and employment at all costs, active social policy and issue of loan bonds in order to prop up the economy as well as Russian financial support and a few other factors.

However, the key shortcomings were not fully eliminated, and consequently they (along with other factors) somewhat worsened the economic situation, leading to a new, local currency crisis from March to October 2011.

The economic situation worsened largely due to the large balance of payments deficit, a reduction and restriction of foreign financing sources, and a lack of inflow of foreign currency in early 2011. All of this sharply reduced the international reserves of the National Bank of the Republic of Belarus (hereinafter, the “NBRB”) in the first quarter of 2011 and subsequently led to a foreign currency deficit in the country.

The main distinguishing features of the new wave of the crisis are:

- Considerable inflation. As of the end of 2011, officially declared inflation was 108.7%. According to the joint opinion of the Big Four companies, the Belarusian economy was hyperinflationary in 2011. As a result, IAS 29 “Financial Reporting in Hyperinflationary Economies” should be applied when reports are drawn up with regard to the International Financial Reporting Standards (IFRS) by companies whose functional currency is the Belarusian ruble.

- Multiple increases in interest rates in the monetary and credit market. The NBRB gradually increased the basic refinancing rate in Belarusian rubles from 10.5% on 31 December 2010 to 45% on 31 December 2011.

- “Duality” of the exchange rate of the Belarusian ruble against basic foreign currencies until October 2011, i.e., the official exchange rate of the Belarusian ruble substantially differed from the actual exchange rate. On 24 May 2011, for instance, the exchange rate of the Belarusian ruble against the US dollar was officially reduced by 64% in comparison with the exchange rate on 31 December 2010. The actual market exchange rate differed from the official rate by 40%, indicating that there was a substantial foreign currency deficit in the country. On 21 October 2011, the exchange rate of the Belarusian ruble against the US dollar was officially reduced by another 76% in comparison with the exchange rate on 24 May 2011. Such a duality of the exchange rate in various currency markets no longer exists at present.

- Companies have far fewer opportunities to acquire foreign currency to settle foreign trade transactions, including settlements at the actual exchange rate that existed until 21 October 2011.

- A noticeable drop-off in business activity, expressed first and foremost in the suspension of several investment projects, or at least in investors’ attempt to reconsider the financial and economic terms of projects.

In 2011, the Belarusian leadership took steps to overcome the consequences of the crisis. In June 2011 the country received foreign financial support from the anti-crisis fund of the Eurasian Economic Community (hereinafter, the “EAEC”) to be provided in six tranches in 2011–2013. The first two tranches were granted in 2011 and two more in the first half of 2013. In late 2013, however, the EAEC’s anti-crisis fund postponed its decision on the sixth and final tranche of US$440 million. The last tranche was originally to have been granted in November 2013, but as of 1 October 2013 Belarus had not satisfied 10 points (five of them key) in the credit program. The last tranche is now expected in September–October 2014. Substantial support by Russia in providing loans and its participation in privatizing 50% of the shares of the state-owned
open joint-stock company Beltransgaz helped noticeably to increase the international reserves of the NBRB as early as December 2011. According to the officials of the Council of Ministers and the NBRB, the size of the reserves reached a level sufficient and stable enough to prevent a foreign currency deficit and to meet the country’s requirements for foreign short- and medium-term financing.

New measures are being elaborated and carried out in 2012. Advantageous oil and gas agreements with Russia that took effect on 1 January 2012 have played an important part in this respect. Consequently, the economy has shown evidence of recovery, as expressed in the reduction of inflation, the growth of the NBRB’s international reserves and a drop in the refinancing rate. Growing interest by foreign companies in projects in Belarus is indirect evidence of its economic revival.

In 2012, against a background of tight monetary policy, the following key trends were observed:

- Growth in prices slowed, compared with 2011, as the role of administrative price regulation grew. The level of inflation dropped from 108.7% in 2011 to 21.8% in 2012, and the base rate of refinancing was lowered to 30% as of 31 December 2012.
- A positive foreign trade balance in the first half of 2012 gradually declined into negative figures in the second half of the year.
- Overall, the supply of foreign currency exceeded demand on the domestic currency market, while the population bought more foreign currency than it sold, based on year-end results.
- Interest rates on the credit and deposit markets decreased due to a steady decline in the refinancing rate and interest rates on the interbank credit market.
- Banks saw an influx of funds from the population.
- Strong demand for bank credit, primarily in foreign currency, persisted.

Overall, 2012 and 2013 were years of macroeconomic stabilization for Belarus, following the hyperinflation and precipitous drop experienced in 2011. The economy also saw such positive trends as a lightening of the tax burden (including a reduction in profits tax from 24% to 18%), lower interest rates on loans, and expanded access to international capital markets. It must be noted, however, that this was largely achieved by obtaining additional credit resources from international credit institutions. This could ultimately hamper economic growth rates if the foreign economic situation deteriorates while overall foreign debt payments grow.

Inflation declined in 2013 to the level of 16.5% by 31 December 2013. The base rate of refinancing was lowered to 23.5% as of 31 December 2013. GDP grew 0.9% in 2013. The banking system suffered from a liquidity crisis in the second half of 2013, driving up Belarusian ruble rates on capital markets as compared with the beginning of the year. The official exchange rate of the Belarusian ruble was relatively stable in the first half of 2013, but gradually weakened against the main foreign currencies beginning in June. In December 2013 Russia’s VTB Bank provided Belarus with a $440 million bridge loan, and this stabilized further pricing policy at the end of the year.
Leading industries during the crisis

The rapid and steady growth of many Belarusian industries in the last decade was interrupted by the global economic crisis in 2008–2009. The fuel and petrochemical sector suffered the most from the price shock. Sales problems resulted in frequent work stoppages at many enterprises, especially in the automotive industry and other machine-building sectors.

The crisis of 2011 also had a considerable impact on certain industries. This is particularly true of industries that substantially depend on imported materials and assembly parts. In this respect, the reduction of the so-called “import dependence” of the economy became one of the main lines of state industrial policy. This is expressed, for instance, in an effort to maximally localize certain types of production and to stimulate the production of assembly parts or develop Belarusian analogues to them.

However, the steps that have been taken are not systematic, and an evident change in the economic structure has not been effected so far.
Financial system

Banking activity regulator
The NBRB is the main regulator of banking activity. It issues licenses to all banking institutions in Belarus. Such a license allows a bank to perform banking operations, including attracting the financial resources of individuals and/or legal entities for bank accounts (deposits), opening and maintaining bank accounts for individuals and/or legal entities, currency exchange operations, issuing bank guarantees, the fiduciary management of financial resources, and factoring. There are special requirements for certain types of banking operations.

State regulator of stock exchanges and the securities market
The Securities Department of the Ministry of Finance of the Republic of Belarus (hereinafter, the “Finance Ministry”) is engaged in the execution, control, coordination and oversight of state regulation of the securities market, as well as the control and oversight of the issuance, flotation and redemption of securities and the activity of professional participants in the securities market and stock exchanges.

The functions of the Securities Department of the Finance Ministry are:
- Drafting legal acts on state regulation of the securities market and sending them for consideration to the Finance Ministry
- State registration of issues of shares and bonds
- Maintaining the state registers of shares and bonds
- Participating in licensing professional and stock exchange activities involving securities
- Accrediting securities market specialists
- Controlling and overseeing the issuance, flotation and redemption of securities
- Controlling and overseeing the activity of professional participants in the securities market and stock exchanges
- Issuing certificates for the flotation of shares in/outside Belarus
- Elaborating the standards and norms of corporate conduct for joint-stock companies.

Currency control

General principles
Historically, the currency control area has been a source of confusion and uncertainty for foreign investors operating in Belarus. It remains important that foreign investors address any potential currency control issues in advance of concluding any significant transactions with Belarusian residents.

In general, residents must make payments to each other in Belarusian rubles. The Belarusian Law on Currency Regulation and Currency Control (hereinafter, the “Law on Currency Control”) and other legislative acts contain a list of cases in which residents can settle payments to each other in foreign currency (foreign currency securities, foreign currency payment documents).

Residents can determine a contract’s equivalent price in any foreign currency, but they still must make payments in Belarusian rubles only (unless currency legislation directly stipulates the possibility of settlements in foreign currency).

Restrictions on transactions between residents and nonresidents
All transactions in foreign currency or Belarusian rubles between Belarusian residents and nonresidents are regarded as currency transactions. The Law on Currency Control divides them into current transactions and capital transactions.

The list of current currency transactions is closed. All other currency transactions, except for those regarded as current under currency law, are capital currency transactions.

Residents and nonresidents may conduct current currency transactions without any restrictions or permission from the NBRB.

Generally, to carry out capital currency transactions, Belarusian residents obtain permission from the NBRB. In some cases, the currency legislation provides exceptions to this rule.
Nonresidents for the purpose of Belarusian currency legislation

Belarusian nonresidents are:

- Foreign citizens and stateless persons (except for those having Belarusian permanent residency permits)
- Foreign legal entities, their branches and representative offices in Belarus and other countries
- Companies that are not foreign legal entities located outside Belarusian territory, as well as their branches and representative offices in Belarus and other countries
- Diplomatic and other official representations and consular offices of foreign states located in Belarus and in other countries
- International organizations, their branches and representative offices
- Foreign countries, their territorial units.

Current currency transactions

Current transactions include the following transactions between residents and nonresidents:

- Settlements under deals assuming export and/or import of goods (excluding money, securities and immovable property), protected information, intellectual property rights, works and services
- Settlements under deals assuming transfer and/or receipt of property in rent (lease)
- Transfer and receipt of dividends and other income on investments
- Non-trade transactions (transfer and receipt of monies for salary payments or pensions or as part of an inheritance, stamp duties, etc.).

Currency transactions that require the permission of the NBRB

The following transactions of Belarusian resident companies (non-banks), inter alia, require permission from the NBRB:

- Acquisition of property located outside Belarus that qualifies as immovable property under current Belarusian legislation
- Allocation of funds to nonresident banks or transfer of funds to nonresidents (except for nonresident banks) for trust management
- Provision of loans
- Settlements under a resident's obligations as a guarantor towards a nonresident arising from a guarantee or an indemnity agreement
- Receipt of loans in case of any of the following conditions:
  - The interest rate for loans exceeds the level determined by the NBRB (for USD and EUR loans it is currently 14% per annum)
  - The interest rate for loans in the event of late repayment (in the event of interest rate increases due to delayed repayment) and the amount of penalties (fine, default interest) in the aggregate exceeds the level determined by the NBRB (0.01% per day or 3.65% per annum)
  - The loan agreement (along with the interest rate) contains an obligation to carry out other additional charges (except payments for the use of loans in the event of late repayment or payments for paying a penalty)
- The loan is used to pay the liabilities of the borrower without being received in the borrower's bank account
- Repayment of the loan is not executed from the borrower's bank account
- The lender is registered in an offshore zone
- Settlements under the obligations of a resident towards nonresidents arise on the basis of cession agreements or debt transfer agreements.

The law also requires Belarusian residents to receive permission from the NBRB to open bank accounts outside of Belarus in nonresident banks for the following purposes:

- For the support of a representative office (except for Belarusian diplomatic and other official missions) or a branch outside Belarus
- For the support of health facilities outside Belarus
- To finance construction, building maintenance or a geological survey and other field works performed outside Belarus
- For settlements in transactions relating to industrial and economic activity in a foreign country
- To receive a loan from a nonresident bank if the terms of the contract provide for opening a current bank account
- For placement of funds (excluding budget funds) in a depositary account or escrow account with a nonresident bank.
Specific requirements for foreign trade agreements

Registration of foreign trade agreements
It is obligatory to register every foreign trade agreement with a bank if the fee for the goods equals or exceeds the equivalent of EUR3,000.

A resident is not required to register appendices to a foreign trade agreement on transfer of goods or to a foreign trade agreement on transfer of protected information, intellectual property rights, works and services. Banks do not charge a fee for registration (re-registration) of foreign trade agreements.

Execution of foreign trade agreements
Residents should complete each foreign trade transaction within the following terms:
- For export: within 90 calendar days (120 calendar days under commission agreements) of the date of shipment (transfer of protected information or intellectual property rights), performance of works or rendering of services
- For import: within 60 calendar days of the payment day.

These terms can be extended by the NBRB’s decision if the requirements of the Council of Ministers and the NBRB are met.

Advance payments under foreign trade agreements
The Law on Currency Control allows an advance payment in foreign currency by a resident under a foreign trade agreement with a nonresident, inter alia, in the following cases:
- A Belarusian company-importer may carry out advance payments using its foreign currency available in a foreign currency bank account and received after 15 November 2008 as:
  - Revenue
  - Contributions to charter fund
  - Foreign sponsor aid
- Dividends and other income on investments
- Interest under loan agreements concluded with nonresidents
- Interest on foreign currency placement in bank accounts
- Interest on Belarusian banks’ debt obligations
- A Belarusian company-importer is allowed to make advance payments by using foreign currency received under loan/credit agreements concluded with nonresidents.
- A Belarusian company-importer may carry out advance payments by the “letter of credit”.
- A Belarusian company-importer may carry out advance payments with the written consent of the NBRB.

There are no restrictions on advance payments in foreign currency made to residents of the Russian Federation and Kazakhstan.
Doing business in Belarus  >  Belarusian economy

**Obligatory sale of foreign currency**
Every resident should sell 30% of foreign currency received from foreign trade transactions via auction at the Belarusian Currency and Stock Exchange, except for certain cases established by legislation.

**Liability for violating currency law**
The penalties for violating currency legislation can be quite significant. The Belarusian Administrative Code envisages different kinds of currency legislation violations that are penalized with varying amounts of fines.

Examples of Belarusian currency legislation violations are given below:

- Illegal acceptance of foreign currency as a means of payment leads to a fine ranging from 10 to 50 basic units (approximately USD150 to USD750; one basic unit is approximately USD15 in equivalent).
- Carrying out a capital currency transaction without permission of the NBRB leads to a fine ranging from 10 to 100 basic units (approximately USD150 to USD1,500).
- Delay in obligatory sale of foreign currency leads to a fine ranging from 10 to 40 basic units (approximately from USD150 to USD600) and, for an individual entrepreneur or a legal entity, of up to 1% of the unsold foreign currency for every day of delay, but not more than the amount of the unsold currency.
- Unreasonable understatement of the amount of foreign currency that is subject to obligatory sale leads to a fine ranging from 10 to 40 basic units (approximately from USD150 to USD600)
and, for an individual entrepreneur or a legal entity, a fine in the amount of the unreasonable understatement.

- The opening of a bank account outside Belarus by an authorized person of a legal entity or by an individual entrepreneur and the performance of transactions using this bank account without the permission of the NBRB leads to a fine ranging from 20 to 50 basic units (approximately USD300 to USD750).

- Transfer of revenue from export of goods (works, services) without its receipt in the exporter’s bank account and without the required permission leads to a fine in the amount of transferred funds.

- The failure to receive revenue on time or to complete a foreign trade transaction on export of goods (protected information, intellectual property rights, works and services) by the methods envisaged by law; or the failure to receive goods (protected information, intellectual property rights, works and services) or complete a foreign trade transaction on import by the methods envisaged by law leads to a fine of up to 30 basic units (approximately USD450) and, for an individual entrepreneur or a legal entity, of up to 2% of the amount of the foreign trade transaction for each day of delay, but not more than the total amount of the foreign trade transaction.

For certain offences, additional criminal liability can be imposed on the executives of the violating legal entity. The non-compliance of banks with currency control regulations may result in the revocation of their licenses.

In this respect, it is strongly recommended that this area be given due attention before any material transactions are concluded.
Investment legislation and main incentives
**Investment legislation**

Pursuant to the Law “On Investments”, investments are any assets or other objects of civil rights that belong to an investor by right of ownership or on another lawful basis allowing the investor to dispose of such objects and that are invested in Belarus as envisaged by this law for purposes of earning profit (income) and/or achieving other significant results or for other purposes unrelated to personal, family, household or other such use, including:

- Movable and immovable property, including equity, participatory interest in authorized capital, shares in the assets of a commercial organization established in Belarus and money, including loans, credits and other funds raised
- Rights of demand that have a valuation
- Other objects of civil rights that have a valuation, except for objects of civil rights that are not permitted to be in circulation (objects withdrawn from circulation).

In Belarus, investments may be made:

- By establishing a commercial organization
- By acquiring or creating immovable property, including by means of construction
- By acquiring intellectual property rights
- By acquiring equity, participatory interest in authorized capital and shares in the assets of a commercial organization, including when a commercial organization’s authorized capital is increased
- On a concession basis
- In other ways not prohibited by Belarusian law.

Also, the Law on Investments:

- Establishes the basic principles for carrying out investment activities in Belarus
- Establishes the conditions for compensation for excepted investments or other property developed in the course of performing investments activities
- Determines the authorized agencies empowered to resolve disputes (disagreements) between a foreign investor and Belarus.

Distinctive features of investment activities under different conditions are described below.

**Investment agreement with Belarus**

An investment agreement is a special type of contract concluded to provide additional government support to investment projects. Investment agreements are concluded between a foreign or national investor (investors) and Belarus as represented by the Council of Ministers or a republican government body.

### Two levels of investment agreements

The conclusion of an investment agreement may be based on the decision of any of the following state authorities:

- Republican government body or other state company subordinated to the Council of Ministers, Administrative Affairs Office of the President of the Republic of Belarus (hereinafter, “President”), regional executive committee
- The Council of Ministers with the permission of the President.

### Incentives under an investment agreement

Irrespective of the contracting party representing Belarus, all types of investment agreements assume a number of incentives exclusively provided under the agreement. The most important of them are:

- The site’s construction under the investment project along with the elaboration, expert examination and approval of required project documentation for each stage of construction together with a design for succeeding construction stages
› Rental of the land plot requisite for construction is provided without auction
› The right to remove vegetation without paying compensation for the removed vegetation during the site’s construction under the investment project
› Full credit for VAT paid for goods, works, services and property rights used for designing, constructing and equipping sites under the investment project
› Exemption from paying custom duties and VAT on import of technical equipment (assembly and spare parts) under the execution of the investment project
› Exemption from paying state duty for obtaining permission for the engagement of foreign labor in Belarus and special work permissions for foreign individuals attracted for the realization of the investment project; in addition, these foreign individuals are exempted from the state duty for a temporary residency permit
› Exemption from compensating for agricultural and forestry-based losses derived from acquiring a land plot for the execution of the investment project
› Exemption from paying land tax or rent for land plots provided for project construction under the investment agreement during the design and construction period and until 31 December of the year following the year when construction was completed.

Investors can benefit from any other incentives stipulated by internal Belarusian legislation and not exclusively provided for under the investment agreement.

**Incentives granted by the President**

Investment agreements concluded under the Council of Ministers’ decision with Presidential approval may provide for more incentives and benefits even though they are not envisaged in the law directly. These incentives are defined individually in each separate case.
Free economic zone

Free economic zones (hereinafter, “FEZ”) are territories with a special regime for entrepreneurial activity and with special incentives for business development, e.g., tax and customs benefits.

Belarus has six FEZs: Brest, Minsk, Gomel-Raton, Vitebsk, Mogilev and Grodnoinvest.

FEZ residents

Benefits are available for FEZ residents registered on FEZ territory.

The candidate should submit a set of documents to the FEZ Administration and pay the state duty. One of the requirements for registration is to prepare a business plan for an investment project, which should stipulate investment of at least EUR1 million.

The preferential tax regime applies to FEZ residents in the following cases:

- Export of goods (work, services) produced (performed) by residents on FEZ territory
- Sale of goods (work, services) on the territory of Belarus, provided that the goods are import-substituting in the list determined by the Council of Ministers and approved by the President; in this case, the preferential tax regime is effective until 1 January 2017
- Sale of goods (work, services) produced (performed) by residents on FEZ territory to other FEZ residents.

Benefits for FEZ residents

The following key benefits exist:

- Exemption from corporate profit tax (hereinafter, “CPT”) for five years from the date of first profit declaration. Subsequently, tax is paid at a rate reduced by 50%, with a maximum rate of 12% (thus, in 2014, FEZ residents pay 9% CPT). Profit from uncovered activity is subject to profit tax at the general rate of 18%.
- Exemption from real estate tax on buildings and construction (including over-normative construction in progress) situated on the territory of the relevant FEZ, irrespective of the way in which they are used. The benefit for FEZ residents registered prior to 1 April 2008 will remain unchanged through 31 March 2015, while for FEZ residents registered after 1 April 2008, it will remain unchanged for seven years following the date of registration.
- Exemption from land tax on land provided for construction during engineering and construction, but for not for more than five years from the registration date (for FEZ residents registered after 1 January 2012). For FEZ residents registered prior to 1 January 2012 the benefit applies from 1 January 2017, but for not more than five years.

- VAT on sales in Belarus by FEZ residents of import-substituting domestic goods (in accordance with the list of import-substituting goods) produced in a FEZ is paid at a rate of 10% (instead of the 20% general VAT rate). This benefit can be applied until 1 January 2017.

FEZ residents pay VAT, excise duties, ecological tax, natural resource extraction tax, land tax (or rental payment), state duty, patent duties, offshore duty, license and registration fees, stamp duty, customs duties and fees, local taxes and levies and contributions to the Social Protection Fund (hereinafter, “social security contributions”) according to the general procedure. In addition, they act as tax agents.
Hi-Tech Park

The Hi-Tech Park (hereinafter, “HTP”) was established in Minsk in 2005 to promote the IT industry in Belarus. The HTP is located east of Minsk and has a special legal regime in effect until 2020.

HTP resident status

A legal entity and an individual entrepreneur receive HTP resident status if their activities include:

- Analysis, projection and software provision of information systems
- Data processing using either the consumer’s, entity's or entrepreneur’s own software
- Fundamental and applied research, experimental R&D in the field of natural and technical sciences (R&D involving HTP activity) and implementation of R&D results
- Other activity approved by the Council of Ministers after it is agreed on by the President.

Benefits for HTP residents

HTP residents pay 1% of their revenue to the HTP Administration and enjoy the following benefits:

- Exemption from CPT
- Exemption from VAT on the sale of goods, work or services or from the transfer of property rights in Belarus (a few exceptions include rent received from leased immovable property and the sale of goods placed under the customs procedures of export or re-export or exported to countries without an obligation to return such goods to Belarus)
- Exemption from land tax (but not for more than three years) within the HTP during the construction by HTP residents of buildings and structures for their own activity
- Exemption from real estate tax paid for buildings and construction (including over-normative construction in progress) which are in the HTP, except for buildings and construction (or parts of them) that are leased out
- Personal income tax rate of 9% is applied to the income of an HTP resident’s employees (except for administrative staff, e.g., security guards, cleaners, etc., who pay income tax at the general rate of 12%) as well as of individual entrepreneurs who are HTP residents
- The social security contribution is calculated on the basis of an amount which is not more than the average salary in Belarus for the preceding month (except for administrative staff, e.g., security guards, cleaners, etc., from whose
• Dividend payments are not subject to an offshore duty
• The requirement to sell foreign currency revenue received from the above-mentioned activities does not apply to HTP residents
• An exemption from customs duties and VAT charged by the customs authorities on the importation of goods for the above-mentioned types of activity (a list of these goods is approved by the President). HTP residents cannot transfer the imported goods to third parties or use them in a way other than for the above-mentioned types of activity for two years from their release date. Otherwise, customs payments should be made and other requirements set forth in customs legislation should be met.

China-Belarus Industrial Park

The China-Belarus Industrial Park (hereinafter, the “CBIP”) was created with the support of the People’s Republic of China in accordance with the Agreement between the Council of Ministers and the Government of the People’s Republic of China. The CBIP is located in the southwest part of Smolevichi Region (55 km from Minsk) and occupies a land allotment of 8,084 hectares. The CBIP is a territory with a special regime in effect for entrepreneurial activity until 2062.

CBIP resident status

A Belarusian company can receive CBIP resident status if it meets the following conditions:
• It is actually located on CBIP territory
• It is registered with the CBIP Administration as a resident of the CBIP
• It is contemplating developing an investment project of a size and in a sphere that accords with the Regulations of the CBIP (to be established by the Council of Ministers)
• Declared investments in the investment project amount to the equivalent of at least USD5 million.

Benefits for CBIP residents

The following main tax benefits exist:
• Exemption for 10 years from the date of state registration from CPT for realization of goods (performance of work, services) of a company’s own production and produced on the territory of the CBIP (that it is a company’s “own production” should be confirmed by a certificate from the Belarusian Chamber of Commerce and Industry). After this 10-year period expires, tax is paid for another 10 years at half the general rate (9%). Profit from other activities is subject to CPT at the general rate (currently 18%).
• Exemption for 10 years from the date of state registration from real estate tax on buildings and structures (including over-normative construction in progress) and parking places situated on CBIP territory. After the 10-year period expires, tax is paid for another 10 years at half the general rate.
• Exemption for 10 years from the date of state registration from land tax on land located on CBIP territory. After the 10-year period expires, tax is paid for another 10 years at half the general rate.
• A personal income tax rate of 9% applies to the income of a CBIP resident’s employees (this provision is effective until 1 January 2027).
• Payments by CBIP residents to foreign companies in the form of royalty are subject to withholding tax at a rate of 5% (this provision is effective until 1 January 2027).
• The social security contribution is calculated on the basis of an amount that is not more than the average salary in Belarus for the preceding month.

After the expiration of the respective periods of benefits, all taxes are paid by CBIP residents at the general rates.
Other benefits:

- Exemption from paying state duty for obtaining permission for the engagement of foreign labor in Belarus and special work permissions for foreign individuals

- Exemption from paying compensation for agricultural and forestry-based losses derived from acquiring a land plot for the execution of the investment project

- Exemption from the obligatory sale of foreign currency gained from activity in the CBIP (this provision is effective until 1 January 2027)

- Exemption from import duties and import VAT charged by the customs authorities on goods (technological equipment, spare parts and materials) imported for the realization of investment projects and construction of objects on CBIP territory. These goods should be used only for the indicated purposes; otherwise, import duties and VAT must be paid in full.
Business activities in medium-sized/small towns and rural areas

There are a number of benefits for the companies and individual entrepreneurs doing business in medium-sized/small towns and rural areas except for those that are directly listed by legislation (among areas where the regime is not applicable are regional cities – Brest, Vitebsk, Gomel, Grodno, Minsk, Mogilev - and certain others).

Companies and individual entrepreneurs doing business in medium-sized/small towns and rural areas under this regime are exempt from:

- Corporate profit tax and personal income tax, respectively, for seven years after registration of the business
- Real estate tax on the objects (including capital buildings and structures that are over-normative construction in progress) located in medium-sized/small towns and rural areas
- State duties for obtaining special permissions (licenses), introduction of changes into special permissions (licenses) and their prolongation
- Obligatory sale of foreign currency received under transactions with Belarusian nonresidents
- Customs duties for equipment (the list of such equipment is closed) in case of contribution of such equipment into the charter fund, provided that legal entity will use such equipment for five years in its entrepreneurial activity.

Certain other benefits are provided in addition to these exemptions.

The exemption period is seven years beginning from the date of the state registration of business in medium-sized/small towns and rural areas.

Companies and individual entrepreneurs doing business in medium-sized/small towns and rural areas may apply for tax incentives for corporate profit tax provided that:

- They keep separate accounting for revenue/expenses received/incurred from operations in medium-sized/small towns and rural areas
- They obtain a certificate of own production from the Belarusian Chamber of Commerce and present it to the tax authorities.

The following incentives are introduced for subdivisions of companies created in medium-sized and small towns and rural areas (for subdivisions created not later than 31 December 2018):

- Exemption from corporate profit tax
- Exemption from the real estate tax usually paid for buildings (structures) and car parking spaces, if this immovable property is recorded on a balance sheet of the subdivision.

Companies and individual entrepreneurs doing business in medium-sized/small towns or rural areas and rendering cargo, passenger and luggage transportation services are able to enjoy benefits only if:

- The departure (loading) point and/or destination (discharging) point is located in a medium-sized or small town or a rural area, and
- The transport used for such services is registered with authorized agencies in a medium-sized or small town or a rural area.
Corporate forms

A foreign company can operate in Belarus either through:
- A separate Belarusian legal entity, or
- A representative office of a foreign company.

The most commonly used types of Belarusian legal entities are limited liability companies, closed joint-stock companies and private unitary enterprises. Other corporate forms (e.g., full or limited partnerships) are theoretically available to foreign investors, but they are rarely used.

Limited liability company

The limited liability company (“LLC” or “OOO” in Russian) seems to be the most popular corporate form in Belarus. In practice, the majority of foreign companies starting their activities in Belarus prefer to establish an LLC.

The charter fund of an LLC consists of the nominal values of its participants’ participatory interests. The minimum charter fund of an LLC is currently not set. Payments for participatory interests may be in the form of cash and/or in-kind payment with shares of other companies, assets, equipment, etc. Participatory interests of LLCs differ from shares of joint-stock companies, because participatory interests are not securities and should not be registered with a governmental body.

An LLC’s charter may contain certain restrictions related to the transfer of a participant’s rights, such as a prohibition against sales of participatory interests to third parties and the withdrawal of a participant from the LLC without the consent of other participants. If the charter provides for the right of withdrawal, a withdrawing participant should be paid the value of its participatory interest in the authorized capital as well as the amount of profit corresponding to that interest.

The number of participants in an LLC can be up to 50. An LLC shall have a minimum of two founders.

The governing bodies of an LLC are the general meeting of participants and the board of directors (optional). An individual executive body (director) runs its

</table>
day-to-day business; there can also be a collective executive body (managing board) running it.

The members of an LLC are not responsible for its obligations and bear the risk of loss only within the limits of their participatory interests.

**Private unitary enterprise**
A private unitary enterprise (“PUE” or “ЧУП” in Russian) is also a very popular corporate form in Belarus. The main difference from an LLC is that a PUE’s founder remains the direct owner of its property.

The property of a PUE is indivisible and may not be divided into contributions (participatory interest, shares). Both an individual (jointly owned by spouses) and a legal entity can privately own the assets that belong to a PUE by right of economic management. Common ownership of a PUE’s assets is prohibited.

The PUE has the right to dispose of all the property that belongs to it by right of economic management except for real estate (if other restrictions are not set by the founder in the charter). Any disposal of real estate (including sale, lease, mortgage, etc.) can be carried out only by the founder's decision.

The minimum charter fund of a PUE is currently not set. Payments into the charter fund may be both in cash and in kind, when it is paid with shares of other companies, assets, equipment, etc.

The maximum number of participants in a PUE is one.

The governing body of a PUE is the director, who shall be appointed by the owner or by a body authorized by the owner and accountable to it.

A PUE is liable for its obligations, with all of the property belonging to it by right of economic management. It doesn’t bear liability for the obligations of the owner of its property.

**Joint-stock company**
Joint-stock companies (hereinafter, JSC) might look a bit more complicated from an administrative standpoint. JSCs generally fall into two categories: closed and open. The difference between them is that in an open JSC, shares may be freely sold to third parties, while in a closed JSC, share transfers are subject to the preemptive rights of other shareholders.

The minimum charter fund requirement for incorporation is currently:
- 100 basic units (approximately USD1,500) for a closed JSC
- 400 basic units (approximately USD6,000) for an open JSC.

The maximum number of shareholders cannot exceed 50 for a closed JSC but is unlimited for an open JSC. The JSC shall have a minimum two founders.

Joint-stock companies can distribute two types of shares: ordinary (voting) and preference shares. The owner of a preference share receives fixed dividends and has the right to equity when a company is being liquidated, but does not get the right to vote in managing the company. The nominal value of such preference shares that are distributed must not exceed 25% of the company’s charter fund.

An open JSC must comply with a number of information disclosure requirements. For this reason, a closed JSC is generally preferred and may be used for setting up a joint venture with a Belarusian partner. In most cases, if a company is an open JSC, it means that previously it was a state unitary enterprise and was transformed into an open JSC in the course of privatization (the state continues to be the stakeholder).

**Representative offices**
Foreign companies may also operate in Belarus without creating a legal entity by establishing a representative office. A representative office is generally understood to be a subdivision of a foreign legal entity that represents the company’s interests in Belarus, and not a separate legal entity.

Its main purpose is generally to carry out activity of a preparatory and auxiliary nature on behalf of and at the behest of a foreign company, including:
- Researching Belarusian goods markets
- Researching investment opportunities in Belarus
- Establishing commercial organizations with the involvement of foreign investors in Belarus.

Effective 1 January 2014, representative offices of foreign companies are not permitted to engage in entrepreneurial activity.
Registration of companies in Belarus

Companies must be registered with the state registration authority, which takes care of further registration with the tax authorities, the Social Protection Fund, statistics bodies, the Belarus Republican Unitary Insurance Company Belgosstrakh, etc.

A representative office should be accredited with the Belarusian Ministry of Foreign Affairs. After that, it should separately apply for registration with the tax authorities, the Social Security Fund, statistics bodies and the Belarus Republican Unitary Insurance Company Belgosstrakh.

On the whole, setting up a representative office is much more burdensome, i.e.:

<table>
<thead>
<tr>
<th>Time of registration (setting up)</th>
<th>Legal entity</th>
<th>About 1.5–2 weeks</th>
<th>Representative office of a foreign company</th>
<th>About 1–1.5 months</th>
</tr>
</thead>
<tbody>
<tr>
<td>State duty amount</td>
<td>3 basic units</td>
<td>(approximately USD45)</td>
<td>195 basic units (approximately USD2,925) for each three years of operation for which a permit is granted to open a representative office</td>
<td></td>
</tr>
</tbody>
</table>

If any documents submitted in connection with registration are unsatisfactory, the applicant may need to re-file them. Also, certain registrations must take place in a prescribed sequence; thus, a delay at one stage of the process can delay subsequent stages.

A newly created company (a representative office) should take additional steps to be fully operational, e.g., open bank accounts, manufacture a corporate seal and register the shares issuance (for JSCs only) with the securities authorities.
Licensing

A special permit (license) is required for certain business activities. Currently, there are 37 such activities (including 230 components). The most important are banking transactions, gambling, the production and wholesale of alcoholic products and tobacco goods, the retailing of alcoholic products and tobacco goods, distributive trade in oil and oil products, medical activity, transportation services, and publishing.

The licensing authorities issue licenses within 15 working days from the date of submission of all required documents.

Mergers and acquisitions

Antimonopoly control
Under the law on competition, certain transactions (including mergers and acquisitions, the establishment of new companies and the purchase and sale of shares and/or assets) are subject to antimonopoly control. An antitrust body’s approval should be obtained prior to registration and the purchase of shares of the company-monopolist on the Belarusian market.

Restrictions applicable to strategic companies
Investments in assets of legal entities holding a dominant position on Belarusian goods markets may not be made without the permission of the antitrust body in cases stipulated by antitrust law. The same is true for investments in other activities prohibited by legislative acts of Belarus.

Investment activity may also be legislatively restricted in the interests of national security (including to protect the environment and sites of historical and cultural value), public order, morality, public health and the rights and liberties of individuals.

Shareholders’ agreements

The legislation and judicial practice of Belarus do not provide for shareholders’ agreements. It is, however, expected that shareholders’ agreements will be introduced soon.
Taxes at a glance

Income tax rates for foreign companies not engaged in activity in Belarus through a permanent establishment:

- Payment for transportation and freight (including demurrage and other payments upon transportation) in the event of international traffic, and for the provision of transport forwarding services: 6%
- Income derived from any debt obligations, including income in connection with credits, loans, securities issued on terms that envisage interest (discount) income, and the use of temporarily available resources in accounts in Belarusian banks: 10%
- Dividends: 12%
- Royalty, income from licenses and other income according to the list set forth in legislation: 15%
- Value added tax: 20%
- Real estate tax: 1%/2% (c)
- Social security contributions:
  - Compulsory social insurance for retirement, disability and loss of breadwinner (pension insurance): 29% (d)
  - Compulsory insurance premiums for disability, maternity, etc.: 6%

(a) The list of taxes is not exhaustive. Additional information is given further on.

(b) A 9% rate applies to profit from the sale of shares (participatory interest in charter capital).

(c) The tax rate is 2% for objects of over-normative construction in progress. The local authorities may set an increasing or decreasing coefficient of up to 2x.

(d) The amount includes 1% payable by an employee. In this case, tax is withheld and paid by the employer.

Tax system

The President, the Belarusian National Assembly and the Finance Ministry are responsible for determining the basic principles of taxation and developing the tax policy in Belarus. The Belarusian Ministry of Taxes and Levies (hereinafter, the “Taxation Ministry”) and its territorial (regional, district) inspectorates practice operative control over taxation.

Today, Belarus has a two-tier tax system:

- Republican taxes and levies. The Tax Code of the Republic of Belarus (General and Special Parts) (hereinafter, the “Tax Code”) and the Presidential Decrees establish them. These taxes and levies must be paid throughout Belarus.

- Local taxes and levies. Regulatory legal acts of the local Councils of Deputies establish them on the basis of the Tax Code. These taxes are payable on the relevant territories only.

Tax audits

The Tax Code envisages several types of tax audits, including in-house (desk) and on-site (field) audits. An audit should not take more than 30 workdays. A planned audit can be prolonged by not more than 15 workdays. There are no restrictions on repeating an audit of already audited periods. However, the Belarusian tax bodies do not as a rule conduct tax audits for periods exceeding five years or repeat audits of tax audit periods. Belarus has a ban on audits for two years from the registration date of a new company.
The periodicity of audits depends on the risk group to which a taxpayer belongs. The tax authorities plan audits depending on the risk profile of a company:

- A high risk group – not more than once a calendar year. If there are no identified tax law violations, they plan the next audit in two years at the earliest (including the year in which the audit was performed).
- A low risk group – when the need arises, but not more than once in five years.

Planned audits are semiannually placed on the website of the Belarusian State Control Committee not later than 15 December and 15 June (see Appendix 1).

Corporate profit tax

**Taxpayers**

CPT payers are (i) Belarusian companies and (ii) foreign companies engaged in activity in Belarus through a permanent establishment.

**Belarusian companies**

Belarusian companies pay tax on profit received in Belarus and abroad.

Taxes for a group or in the event of consolidation cannot be reduced, because each company in the group is a separate taxpayer. A branch that has a separate balance sheet and for which a legal entity has opened a bank account entitling the branch to dispose of funds on the account and perform transactions, calculates taxes and levies (duties) and meets the tax liabilities of such a legal entity.

**Permanent establishment of foreign companies**

Foreign companies pay CPT on profit received through a permanent establishment in Belarus by selling goods (work, services) and property rights as well as on non-sale income reduced by non-sale expenses.

A foreign company’s permanent establishment in Belarus is:

- A permanent establishment through which a foreign company wholly or partially conducts entrepreneurial or other activity in Belarus involving:
  - Construction work and/or services stipulated by agreement(s) as well as the installation, assembly, adjustment, servicing and use of equipment (other assets) and computer programs
  - Sales of goods from warehouses in Belarus
  - Work and/or services on the territory of Belarus and other activity not prohibited by law;

- A company or individual engaged in activity on behalf of a foreign company and/or in its interests, and/or having and using the foreign company’s authority to enter into contracts or agree on their material terms (dependent agent).

A construction site and an assembly unit are also permanent establishments if they have existed in Belarus for over 180 days in any 12-month period.

A place used only for one or several of the following purposes is not a foreign company's permanent establishment:

- Storage, exhibition or supply of goods of own production (“supply” means delivery and shipment of goods without selling them in Belarus through a permanent establishment)
- Procurement of goods for a foreign company
- Gathering or distributing of information for a foreign company
Involvement in other types of activity if the activity is, on the whole, preparatory or auxiliary.

Double tax treaties signed by Belarus with other states may have other rules for determining a permanent establishment.

Object of taxation. Tax base
CPT applies to (i) gross profit and (ii) dividends accrued by Belarusian companies.

Revenue from sales of goods, work, services and property rights are recorded as of the date on which such revenue is recognized in the accounting records based on the accrual method, taking into account certain provisions of law, regardless of the date on which settlement is made.

CPT rate
The CPT rate is 18%. Profit from the sale of shares (participatory interest in the charter capital) of a Belarusian company is taxed at a rate of 9%. A CPT rate of 12% applies to dividends paid by Belarusian companies. Reduced tax rates are also applied in some other cases.

Tax benefits
CPT exemptions:
- Profit from the sale of certain innovative goods or high tech goods of own production
- Income from operations with bonds issued from 1 April 2008 to 1 January 2015 by legal entities deemed tax residents of Belarus
- Profit (not more than 10% of gross profit) transferred to certain budget-funded Belarusian companies or used to pay the bills for goods acquired and transferred to such companies (work or services performed)
- Net profit (except profit from trade and procurement and intermediary activity) of companies that employ disabled persons if such persons account for at least 50% of the average staffing number for a tax period
- Profit from the sale of goods (performance of work and services) at roadside service sites for five years after the start of operations at such sites
- Profit from sales of children’s food products
- Profit of insurance companies from the investment of insurance resources under agreements concerning voluntary insurance relating to life insurance, which is used to increase the accumulation in insured persons’ deposit accounts, etc.

Tax deductible expenses
The list of tax deductible expenses is not exhaustive. All expenses (except for those that are not deductible or deductible within certain limits) should be fully deducted if they relate to the production/sale of goods (work, services, property rights) or if they are non-sale expenses.

In practice, form prevails over substance in tax authorities’ audits and, therefore, certain expenses may be non-deductible if the taxpayer cannot confirm them by an agreement, an acceptance certificate, an invoice, etc.

Interest expenses – thin capitalization rules
Thin capitalization rules restrict tax deduction of a certain portion of interest on loans for CPT purposes. The rules took effect in 2013.

They apply when the debt-to-equity ratio is more than 3:1.

The following are cases in which a controlled debt arises:
- A foreign company that granted a loan owns, directly or indirectly, over 20% in a Belarusian company’s charter capital
- A Belarusian company that grants a loan is an interrelated entity of a foreign company that directly or indirectly owns over 20% in a Belarusian company’s charter capital.
Tax deductible interest is calculated by the following formula:

\[
\text{Maximum amount of deductible interest} = \frac{\text{Interest accrued}}{\left( \frac{\text{Borrower's equity capital} \times \text{Lender's share in the borrower's capital}}{\text{Controlled debt}} \times 3 \right)}
\]

Thin capitalization rules do not apply to banks, insurance companies, lessors or landlords (if the received rental payment (lease payments) exceed 50% of the total revenue from the sale of goods (work, services) and property rights as well as income from rent-out and lease-out operations).

**Interest expenses – other specific features**

Interest expenses on overdue loans do not reduce the CPT base.

Interest expenses on loans for the acquisition of fixed assets are capitalized before the assets are put into operation, while they are capitalized or accounted as non-sale expenses after the assets are put into operation.

**Investment deduction**

An investment deduction is an amount based on the initial value of fixed assets used in entrepreneurial activity as well as the book value of investments made in fixed assets in connection with their reconstruction, modernization or restoration.

A taxpayer may immediately deduct a part of the initial value of fixed assets as well as the book value of investments in fixed assets in connection with their reconstruction, modernization and restoration for CPT purposes as follows:

- Not more than 10%, for buildings and structures
- Not more than 20%, for machinery, equipment and vehicles.

The use of an investment deduction does not affect the depreciation of fixed assets. After taking an investment deduction, the taxpayer may accrue depreciation on the initial value of fixed assets.
Other expenses
Current legislation sets limits for the deduction of business trip expenses, fuel and energy expenses, payroll expenses, insurance expenses and some other expenses.

Loss carry forward
If total costs in connection with the production and sale of goods (work, services), property rights, the net book value of fixed assets and intangible assets, and non-sale expenses exceed the amount of revenue and non-sale income, less taxes and levies paid out of revenue, losses may be carried forward up to the amount of such excess.

The losses can be carried forward within the next 10 years, starting with those incurred in 2011 (the rules took effect in 2012).

Losses are carried forward in groups of operations against identical types of income:
- 1st group – operations with financial derivatives and securities
- 2nd group – alienation of fixed assets, construction-in-progress sites and uninstalled equipment.

Further, the remaining losses are carried forward irrespective of the operations and activity from which they were incurred.

To apply loss carry forward rules, a company should maintain separate accounting and keep documents confirming the amount of losses.

Dividends
Dividends received by Belarusian companies from residents and nonresidents are subject to CPT at a rate of 12%. Dividends distributed by Belarusian companies are taxed at source. CPT on dividends is withheld and transferred to the budget by the companies that pay the dividends.

When dividends are paid by foreign companies, income tax may be withheld in a foreign state. Actually, the amount of tax withheld in a foreign state may be offset when paying CPT in Belarus (see the section “Offset of taxes paid in a foreign state”).

Profit/loss from capital gain
Profit from the sale of tangible and intangible assets is defined on the basis of sales revenue less revenue taxes, assets’ net book value (for depreciable/amortizable assets) or acquisition cost (for non-depreciable assets, e.g., construction-in-progress sites and land lots) and sale costs. The loss from the sale of tangible and intangible assets reduces the tax base.

The CPT rate on profit from the sale of securities (except for cases indicated in the section “Tax benefits”) is standard. Special rules apply to the calculation of profit in REPO transactions.

Profit from the sale of Belarusian shares (participatory interest in the charter capital of Belarusian companies) is taxed at a rate of 9%.

Tax return filing and tax payment
The tax period for CPT is the calendar year. The reporting period for CPT is the calendar quarter. The reporting period for CPT on dividends accrued by Belarusian companies is the calendar month. The amount of CPT for the reporting period is determined on an accumulated basis from the beginning of the tax period.

The taxpayer submits a CPT return not later than the twentieth of the month following the expired reporting period.

CPT payment for the reporting period is made not later than the twenty-second of the month following the expired reporting period. CPT payment for Q4 2014 is to be made not later than 22 December 2014 in the amount of two thirds of CPT for Q3 2014 and subsequently recalculated not later than 22 January 2015.

Tax accounting
Tax accounting is based on financial statements with necessary adjustments. A taxpayer’s accounting policy should stipulate the tax accounting procedure.

Deferred tax assets and liabilities arise when income and expenses in the accounting coincide with those for tax purposes, but they are recognized in different reporting periods. Deferred tax assets and liabilities are accounted in accordance with the instructions of the Finance Ministry.
Typical cases when deferred tax assets and liabilities arise are:
- Loss carry forward
- Receipt of free assistance.

Deferred tax assets and liabilities arise due to deductible and taxable temporary differences, respectively.

Deductible temporary differences arise when:
- Expenses in the accounting are recognized in the current reporting period, while for tax purposes they are recognized in future reporting periods
- Income in the accounting is recognized in future reporting periods, while for tax purposes it is recognized in the current reporting period.

Taxable temporary differences arise when:
- Expenses in the accounting are recognized in future reporting periods, while for tax purposes they are recognized in the current reporting period
- Income in the accounting is recognized in the current reporting period, while for tax purposes it is recognized in future reporting periods.

An analytical record of temporary differences is maintained in the analytical tables, on separate off-balance sheet accounts or by another method. The chosen method is disclosed in an accounting policy.

The amount of deferred tax assets is determined by multiplying the deductible temporary difference of the current reporting period by the CPT rate effective on the reporting date.

Deferred tax assets and liabilities are reflected in the accounting ledgers of the reporting period when the temporary differences arose.

Deferred tax assets are reconsidered annually at the reporting date to determine whether they can be recognized. Deferred tax assets are recognized when there are taxable temporary differences or when it is very likely that deductible temporary differences may reduce taxable profit in the future. Previously recognized deferred tax assets are written off when there are no taxable temporary differences or it is unlikely that deductible temporary differences will reduce taxable profit in the future.

Offset of taxes paid in a foreign state

The taxable profit of a Belarusian company includes profit from activity outside Belarus, in relation to which it is registered as a taxpayer in a foreign state. To avoid double taxation, profits tax actually paid in the foreign state may be offset against CPT in Belarus. The offset amount should not be greater than that to be paid in Belarus.

A Belarusian company must submit a reference to the local tax authorities from the foreign tax body confirming payment of the relevant amount in the tax period when the reference was given. The reference should indicate the following:
- Taxpayer’s name
- Name of tax
- Date of tax payment and the period for which it is paid
- Object of tax and amount of tax base
- Tax rate and amount of tax paid to the foreign budget.

For an offset, a taxpayer may also submit confirmation or another document in the form established by the foreign tax body or other competent authority if it confirms the amount of CPT paid in that state.

Transfer pricing

Tax authorities may control prices only during an on-site tax audit in the following cases:
- Sale of immovable property – when the prices are more than 20% lower than the market prices on the date of the immovable property’s sale
- Foreign trade (including related party transactions) – if the price of one transaction (transactions with one entity) at the date of purchase/sale of goods is more than 60 billion Belarusian rubles (approximately USD6.3 million) in one calendar year and the price of the transaction deviates by more than 20% from the market price at the acquisition or date of sale.

In this respect, foreign trade refers to the sale of goods (including commission, assignment and other similar agreements) to foreign legal entities and/or foreign individuals.
The comparability of prices to market prices is checked only for the purpose of calculating CPT and only if it will increase the tax. The Tax Code gives a list of prices that are not checked:

- Prices set by the requirements of the antimonopoly bodies (Price Policy Department of the Ministry of Economy)
- Prices formed by trade sessions at a registered commodity exchange or in the course of public sale
- Prices determined by an appraiser if an appraisal is mandatory for a transaction
- Prices regulated in accordance with Belarusian or foreign legislation
- Prices set by a state control body, or when there are limits to prices, markups or discounts, or when there are other limitations on profitability.

The following methods are consistently used when determining, for tax purposes, the conformity of transaction prices to market prices:

- Comparable uncontrolled prices method. This compares the transaction price with the market price range for identical (or, if unavailable, homogeneous) goods. The market price range is two or more market prices determined with the available data on prices for the relevant period or for the nearest date prior to the transaction. If the price of the transaction is less than the minimum value of the range, the minimum price of the market price range is used for tax purposes.
- Resale minus method. The market price is determined as the difference between the price at which the goods were resold by the purchaser and the expenses for resale and promoting the goods on the market, as well as the purchaser’s ordinary profit on the resale of goods (without taking into account the purchase price of the goods).
- Cost plus method. The market price is determined as the sum of the incurred expenses and the ordinary level of profit for such activity. Ordinary expenses incurred in such activity for the production and/or sale of goods, transportation, insurance, storage, etc. are taken into account for this method.

Prices are compared with one or several transactions of goods. If the transactions incurred in different periods, comparable prices are adjusted for price indexes.
Withholding tax

Taxpayers paying withholding tax (hereinafter, “WHT”) are foreign companies, including those that are not legal entities and that receive income from sources in Belarus without carrying out activity in Belarus through a permanent establishment.

Object of taxation. Tax base
The following income from sources in Belarus is taxable:

- Dividends and other related income
- Income from debt obligations
- Royalties
- Income from the alienation of immovable property, securities, and equity capital (stocks and shares)
- Income from the provision of advisory, accounting, legal, transport, messenger, intermediary and management services
- Other types of income (there is an exhaustive list of taxable income).

The tax base is usually determined as all income less documented expenses. If income is received in kind, tax is calculated with regard to its worth in cash.

The tax payment obligation arises at the date of income accrual to a foreign company. That date is the earliest of the following:

- The date of accounting of obligations to pay dividends interest, royalties, and sales
- The date of the redemption of securities (apart from shares), the sale of goods under assignment, commission, and other related agreements
- The date of accounting of income payment.

Tax rates
The tax rates are as follows:

- 6% of payment for carriage and freight (including demurrage and other payments upon carriage) relating to international traffic and the provision of transport forwarding services
- 10% of interest income from any debt obligations, irrespective of how they were formed
- 12% of dividends and related income as well as income from the alienation of all or part of Belarusian shares (participatory interest in the charter capital of Belarusian companies) (this rate is not applied when PUEs are sold)
- 15%, which is the generic rate applicable to other types of income subject to WHT.

The double tax treaties of Belarus with other states may contain more preferential terms.

For information on the applicable WHT rates under double tax treaties and Belarusian legislation, see Appendix No. 4.

Tax agents
WHT is calculated, withheld and paid to the budget by Belarusian legal entities and individual entrepreneurs that accrue and pay income to foreign companies.

When foreign companies that do not have a permanent establishment in Belarus receive the following types of income from other foreign companies, they must submit a tax return and pay tax to the budget (it is not clearly regulated how a foreign company can meet such a requirement):

- Income from the alienation of all or a part of immovable property in Belarus
- Income from the alienation of all or a part of Belarusian shares (participatory interest in the charter capital of Belarusian companies)
- Income from leasing out assets (financial leases), rent and other uses of assets that are in Belarus
- Income from immovable property in Belarus that is placed under fiduciary management
- Income from the provision of services in the fiduciary management of immovable property in Belarus
- Income from the use of, or provision of the right to use in Belarus, property rights of works of literature, art and science, computer applications and other works concerning copyright and/or related rights
- Income from securities sale (redemption) transactions in Belarus
Income from organizing, holding and/or taking part in shows in Belarus, as well as from carnivals and travelling zoos. Individuals can also be regarded as tax agents in several transactions.

**Provisions of double tax treaties**

To apply the provisions of double tax treaties, a company must receive confirmation that it has a permanent location in a foreign state with which Belarus has a valid double tax treaty. Such confirmation may be provided in the form established by the Taxation Ministry or in any other form set by the government of a foreign state.

In the latter case, such confirmation should contain the following mandatory data:

- Date of issue (or term of validity)
- Full name of the foreign company and its registered address
- Confirmation that the foreign company was (is) a tax resident of a certain state in order to apply the provisions of international double tax treaties in the period under consideration.

Confirmation should be submitted to the tax authorities either directly or through a company that withholds income tax.

If the foreign company does not meet this requirement, the tax agent withholds the tax at the rates set by the Tax Code. This tax, however, can be offset or reimbursed when the foreign company presents the relevant documents.

**Tax return filing and tax payment**

A tax period is a calendar month.

A tax agent submits a WHT return not later than the twentieth of the month following the tax period. Tax should be paid to the budget not later than the twenty-second of the month following the tax period.
Value added tax

Taxpayers
VAT payers are:
- Companies
- Individual entrepreneurs (with regard to several specific features)
- Trustees
- Individuals obligated to pay VAT, which is collected when goods are imported into Belarus.

Tax registration
There is no separate registration for VAT purposes. A company undergoes tax registration upon receiving its state registration or when a representative office is being registered. The registration is effective for all taxes.

Object of taxation. Tax base
VAT applies to:
- The sale of goods (work, services) and property rights in Belarus, including exchange, transfers free of charge, the sale of goods by a company to its employees, the leasing out of units, and the handover of goods as pledge in the event of failure to fulfill obligations
- The import of goods into Belarus.

When goods (work and services) and property rights are sold, the VAT base is:
- The sale prices (tariffs) of goods (work, services) and property rights, including excise duties (if applicable) without VAT
- Regulated retail prices with VAT included.

For tolling operations from customer-supplied raw materials, the VAT base is the cost of treatment, processing or other transformation of the raw materials without VAT.

When conducting intermediary activity, the VAT base is the amount received as remuneration under assignment, commission and other similar agreements.

When an object of financial lease (leasing) is transferred by the lessor to the lessee, the tax base is the amount of lease payments.

Tax rate
The basic VAT rate is 20%. It applies to most goods and services sold in Belarus.

The sale of farm products (apart from flowers and decorative plants), livestock products (apart from furs), fish and agricultural goods produced in Belarus, as well as the import and/or sale of baby food and children's goods in accordance with the list approved by the President, are subject to VAT at 10%.

Goods for export and transport forwarding services related to export are subject to VAT at 0%.

Place of sale of goods (work, services) and property rights
The place of sale of goods is recognized as Belarus if the goods are located in Belarus and are not shipped or transported to the customer (or recipient indicated by the customer), and/or if the goods are located in Belarus at the start of shipment or transport to the customer.

Belarus is the place of sale of work, services and property rights if:
- The work and services directly relate to immovable property, including property under construction (except for aircraft, marine vessels, inland ships and spacecraft) and/or located in Belarus (this provision also applies to leasing out immovable property and taking it on lease); are services involving the valuation of immovable property by experts or agents; are engineering and design services or services involving the design supervision and technical supervision of construction, where such services are directly related to immovable property
- The work and services relate to movable property within Belarus, with the exception of the rental (financial leasing) of immovable property, including vehicles
- Services are actually rendered in Belarus in the fields of culture, art, education, physical training, tourism, recreation and sports
- The purchaser of the work, services and intellectual property rights is engaged in activity in Belarus and/or the purchaser's location/residence is Belarus.
The last provision applies to the sale (transfer) of intellectual property rights; the rendering of audit, advisory, marketing, legal, accounting, advertising and design services; the rendering of services pertaining to processing and providing information; the fulfillment of R&D, experimental design and experimental technological (or simply technological) work; the rendering of services supporting computer applications and databases and providing disk space; the rendering of services pertaining to projecting, developing, formalizing and modifying web pages and creating databases and ensuring access to them; the rendering of services pertaining to providing and hiring staff if they work at the purchaser’s premises; the rendering of services pertaining to renting and leasing movable property, except for transport vehicles; the rendering of services (work) in developing, adapting and modifying computer applications and databases (programs, information sources and computers), supporting such programs and databases, and a few other services.

If the sale of work and services is of an auxiliary nature in relation to the key work and services, the place of this auxiliary sale is deemed the place of sale of the key work and services.

**Recognition of sales revenue**

The time of the actual sale of goods (work, services) and property rights is determined as the day in the reporting period on which goods are shipped (work is performed, services are rendered) and property rights are transferred, regardless of the date on which settlement is made, with the exception of certain cases set down in law.

Goods are regarded as shipped on:
- The date of their release to the purchaser (to the consignee or a company (individual entrepreneur) that transports (forwards) the goods or handles their delivery), if the vendor does not deliver (transport) the goods or does not incur the costs of their delivery (transportation)
- In other cases, the date determined in the company’s accounting policy (or by decision of the individual entrepreneur), but not later than the date when transportation begins.

The date of the supply of work or services is deemed the date of their transfer under supporting documents (delivery and acceptance statements and other similar documents).

The date of transfer of property rights is the date on which the right to receive payment arises under contract.

**VAT-exempt turnover**

The following sales turnovers are VAT-exempt:
- Medicines, medical devices, instruments, equipment and articles, as well as medicines, devices, instruments, equipment and articles serving veterinary purposes according to the lists approved by the President
- Insurance services, bank operations
- Medical and veterinary services according to the lists approved by the President
- Cultural services according to the list approved by the President
- Goods (work, services) produced (performed, provided) by taxpayers whose industrial production staffs average at least 50% disabled persons in the period under consideration (except for excisable goods, broker and other intermediary services, property rental and leasing)
- R&D, experimental design and experimental technological work entered in the state register according to the procedure determined by the President
- Property rights to industrial units
- Goods produced by the vendor (a Belarusian tax resident) under a sale/purchase agreement with a lessor (a Belarusian tax resident) that acquires the goods to subsequently transfer them under an international lease agreement outside Belarus with right of repurchase.
The following are also VAT-exempt when imported into Belarus:

- Copies of films on any type of storage medium and items of cultural value imported by companies engaged in cultural activities
- Goods intended for official use by diplomatic missions and consulates of foreign states or for personal use by the diplomatic and/or administrative and technical staff of these missions and consulates, and by international organizations and their representations; diplomatic mail and consular valises
- Goods relating to foreign aid gratis and goods receivable (received) as international technical assistance and/or acquired by means of international technical assistance, which are intended for the purposes determined by a project or a program for international technical assistance, according to the procedure and under the terms set by the President
- Equipment and devices for R&D, materials and parts making up a set for R&D and for experimental design and experimental technological work that were imported by Belarusian residents according to the procedure determined by the President.

**Import of goods**

Import operations are subject to VAT.

In the event of import from states that are not members of the Customs Union, the tax base is determined as the amount that includes the customs value of goods for which customs duties and excise duties (when excisable goods are imported) are to be paid. VAT is collected by the customs authority.

**Calculation of VAT**

The VAT to be paid to the budget is calculated as the difference between the total VAT at sale and the VAT credit.

VAT credit is available for input VAT amounts that are:

- Charged by vendors registered as taxpayers with the Belarusian tax authorities to the taxpayer upon acquisition of goods (work, services) and property rights in Belarus
- Paid by the taxpayer when goods are imported into Belarus
- Paid into the budget when goods (work, services) and property rights are acquired in Belarus from foreign companies that are not registered with the Belarusian tax authorities.

The taxpayer is entitled to credit input VAT if:

- Goods (work, services) and property rights were acquired for VATable transactions
- The VAT charged upon acquisition, or paid upon the importation of units, is entered into accounting and the purchase ledger, provided that the ledger is maintained by the taxpayer
- The amount and rate of VAT are indicated in the primary accounting and settlement documents and submitted by the supplier to the purchaser of goods (services)
- VAT is paid to the seller of goods (services) (when the taxpayer recognizes the revenue upon payment).

If the VAT credit is greater than the VAT calculated upon the sale of goods (work, services) or property rights, the difference is credited first and foremost from the total VAT in the next tax period, or in some cases refunded to the taxpayer.
VAT when acquiring goods (work, services) from foreign companies

When a foreign company without permanent establishment or Belarusian tax registration sells goods (work, services) and property rights to Belarusian companies and individual entrepreneurs, they must calculate VAT and pay it to the budget.

This VAT is to be credited according to general procedure.

Tax return filing and payment of VAT

The tax period is the calendar year. VAT payers submit a VAT return monthly or quarterly (at the taxpayer’s choice) on a progressive total basis by the twentieth of the month following the reporting period. The deadline for paying VAT is the twenty-second of the month that follows the reporting period.

VAT in transactions with Russian and Kazakh companies

The Customs Union legislation sets forth a special procedure for paying VAT on the sale of goods (work, services) between companies of the member-states of the Customs Union.

Export of goods

When exporting goods, taxpayers apply the 0% VAT rate and are exempt from paying excise duty in the country of registration. The taxpayers must submit a set of documents to the tax authorities within 180 days from the date on which the goods are transferred.

Import of goods

The importing company has a VAT and excise duties obligation. The company determines the tax base on the basis of the cost of the acquired goods, including excise duties (for excisable goods). The cost of the acquired goods is the supplier’s price. VAT is collected by the tax authorities (this differs from the standard order, according to which the customs authorities collect VAT).

Export and/or import of work and services

VAT is collected in a member-state of the Customs Union whose territory is deemed the place of sale of work and/or services. The tax base, VAT rates and procedure for collecting VAT and tax benefits are determined by the legislation of that state.

Real estate tax

Taxpayers

The payers of real estate tax (hereinafter, “RET”) are companies and individuals, taking into consideration the specific features given below.

In relation to buildings and structures (apart from those put under fiduciary management and/or acquired during fiduciary management) situated in Belarus that were leased by legal entities or taken for other chargeable or free-of-charge use, RET payers are:

- For Belarusian companies: a company that has such buildings, structures or parking places on its balance sheet under contractual terms for rent, lease or other chargeable or free-of-charge use
- For foreign companies that are not engaged in activity in Belarus through a permanent establishment, and for individuals (not discussed in this brochure): the leaseholder company (lessee, borrower)
- For Belarusian companies: a company whose capital construction (buildings, structures), parts thereof, and parking places subject to state registration are on the books (balance sheet) prior to their state registration by the taxpayer
- For Belarusian companies: borrower companies established in the process of transforming rented, collective (public), state and state unitary enterprises to which state-owned capital construction (buildings, structures), parts thereof and parking places were provided for free-of-charge use.
Doing business in Belarus

Companies

Object of taxation. Tax base

RET objects are:

- Buildings, structures and parking places that are owned, possessed or under the economic management or operating management of the taxpayer
- Buildings, structures and parking places situated in Belarus that belong to individuals
- Buildings and structures situated in Belarus that are leased by individual entrepreneurs if, under the contractual terms of the leasing agreement, the objects are not on the balance sheet of the leasing company
- Buildings, structures and parts thereof as well as parking places that are located in Belarus and provided to companies for rental (financial leasing) and other chargeable or free-of-charge use by foreign companies that do not do business in Belarus via a permanent establishment, or by individuals
- Buildings, structures and parts thereof as well as parking places that are subject to state registration and are on the books (balance sheet) of taxpayers prior to their state registration
- State-owned buildings, structures and parts thereof as well as parking places provided for free-of-charge use to joint-stock companies established in the process of transforming rented, collective (public), state and state unitary enterprises

- Buildings, structures and transfer mechanisms of over-normative construction in progress by taxpaying companies.

The tax base is the net book value of buildings, structures and parking places recorded in the accounts as fixed assets and income-bearing investments in material assets as of 1 January of the calendar year.

Tax rates

The RET rate is 1%. For over-normative construction in progress, it is 2%. Local administration bodies may increase or reduce the tax rates for immovable property for certain categories of taxpayers, but by no more than a factor of two. Taxpayers calculate and pay RET at rates increased or decreased in accordance with the decisions of local councils of deputies from 1 January of the year following the year in which the relevant decision was made.

Tax benefits

RET exemptions apply to:

- Buildings and structures that are intended to protect and improve the environment according to the list approved by the President
- Agricultural buildings and structures that are either used or to be used by companies to produce fruits and vegetables, meat, fish and apicultural products
- Buildings and structures for one year after the date on which they are commissioned
- Road service units for two years after the date on which they are put into operation
- Buildings and structures of research companies and scientific and technological facilities, as well as knowhow transfer centers (until 1 January 2016).

Several other objects are exempt from RET, such as buildings and structures deemed to have material, historical and cultural value as well as public railways and roads.

Tax return filing and tax payment

The tax period is a calendar year.

A RET return is submitted to the tax authorities by 20 March of the reporting year. Tax is paid in the amount of one fourth of the annual amount of tax every quarter no later than the twenty-second of the third month of a quarter.
Other republican taxes

**Land tax**

Land tax payers are companies and individuals that possess land plots on the basis of permanent or temporary use, lifetime inheritance demesne, or ownership.

The land tax base is determined on the basis of the land’s value in the State Land Register as well as by its purpose and size.

Double tax rates apply to land lots (or parts thereof) under over-normative construction in progress. A taxpayer must apply a double tax rate from the first of the month following the month in which the normative period of construction expired.

Local government bodies may increase or decrease land tax rates twofold for certain categories of taxpayers. Taxpayers must apply the increased or reduced tax rates (by no more than a factor of two) from 1 January of the year following the year in which the relevant decision was adopted.

The land tax period is a calendar year.

Taxpayers file tax returns to the tax authorities annually by 20 February of the current year. They pay tax in quarterly installments not later than the twenty-second of the second month of each quarter. For agricultural land, taxpayers pay tax not later than 15 April, 15 July, 15 September and 15 November.

**Offshore duty**

The following transactions are subject to an offshore duty:

- Transfer of cash by a Belarusian resident to an offshore resident or to another person (under commitment to an offshore resident), or to an account opened in an offshore zone
- The fulfillment of non-cash obligations to an offshore resident, except for cross obligations when an offshore resident transfers cash to the account of a Belarusian resident
- Transfer of property rights and/or obligations in the course of a person’s substitution, if the parties to the initial transaction are Belarusian and offshore residents.

The transfer of funds by Belarusian banks to nonresidents is not subject to offshore duty if they have international settlement systems using VISA, MasterCard and American Express bank cards and are registered in offshore zones and/or have accounts in such zones under agreements concluded with these nonresidents.

The list of offshore zones includes the British Virgin Islands, Gibraltar, the state of Delaware (USA), etc.

The offshore duty rate is 15%.

The Tax Code establishes certain exemptions from offshore duty, e.g., offshore duty does not apply when a Belarusian resident returns loan principal and interest to an offshore resident.
**Ecological tax**

The ecological tax base is the actual volume of:

- Pollutant emission into the atmosphere
- Emission of waste waters
- Production wastes that are to be stored or buried
- Import of ozone-depleting substances into Belarus, including those contained in products.

The Tax Code establishes ecological tax rates for each taxation unit. The tax rate may vary from BYR530 (approximately USD0.05) to BYR19.38 million (approximately USD1,942) per ton of a contaminant. In some cases, taxpayers must apply special coefficients to the ecological tax rates.

**Excise duties**

The following are subject to excise duties:

- Excisable goods that taxpayers produce and sell in Belarus
- Excisable goods imported into Belarus
- Excisable goods imported into Belarus, upon sale.

Excisable goods include alcohol products, tobacco items, motor fuel, etc. The Tax Code establishes excise duty rates in a fixed amount per physical unit of excisable goods (specific rate) or in a percentage of their value (ad valorem rates).

**Other republican taxes**

These taxes include:

- Tax on the extraction of natural resources
- Duty for the use of public roads in Belarus by motor transport vehicles of foreign states
- Stamp duty
- Consular duty
- State duty
- Patent fee.

**Local taxes and levies**

The local government bodies set local taxes and levies. The Tax Code regulates the general rules applicable to these taxes and levies. Local taxes and levies include:

- Dog tax
- Resort duty
- Procurement duty.
Special taxation regimes

Unified tax for manufacturers of agricultural products
Unified tax applies to (a) companies with revenue from the sale of manufactured agricultural products of at least 50% for the previous fiscal year, and also to (b) companies with branches or other separate subdivisions which manufacture agricultural products and have a separate balance sheet and bank account, provided that their sales revenue from the manufactured agricultural products is at least 50%.

The tax rate is 1%.

Simplified tax system
Companies may apply a simplified tax system provided that their average staff size is not more than 100 employees and their gross revenue is not more than BYR9 billion (approximately USD901,800) for the first nine months of the year before the year in which the taxpayer is planning to apply the simplified tax system (the latter condition also applies to individual entrepreneurs, notaries engaged in notarial activity in a notarial office, and lawyers).

The tax base is the total amount of revenue from the sale of goods (work, services) and property rights as well as non-sale income.

Gambling tax
Gambling tax applies to game tables, game machines, pari-mutuel betting, bookmaker offices, and positive differences between bets accepted and winnings paid (bet refunds). The Tax Code sets fixed tax rates for the gaming business per tax unit, excluding positive differences between bets accepted and winnings paid. The taxpayer must register these units with the tax authorities before their installation (use).

The income from gambling activity is not subject to:

- VAT, except for importation VAT
- Corporate profit tax.

Lottery tax
The lottery tax base is the difference between the amount of income received from organizing and holding lotteries and the amount of the lottery prize. The lottery tax rate is 8%. Income from organizing and holding lotteries and sales turnover from lottery tickets (taking lottery bets) are not subject to:

- Corporate profit tax
- VAT.

Unified tax on the activity of individual entrepreneurs and other individuals
Payers of the unified tax are individual entrepreneurs as well as individuals who do not perform entrepreneurial activity. The Tax Code establishes a list of taxable activities and basic rates in Belarusian rubles per month. The local authorities set the unified tax rates per month within these basic rate limits.

The Tax Code also provides for several unified tax benefits.

In addition to the special tax regimes already indicated, the law also envisages:

- Levy on handicraft activity
- Levy on farm tourism services
- Unified tax on imputed income.
Customs

Overview
Customs regulation in Belarus is based on international standards. Belarus is a member of the World Customs Organization, the International Convention on Harmonized Commodity Description and Coding System (Brussels, 1983), the Convention on Temporary Import (Istanbul, 1990) and the International Convention on the Simplification and Harmonization of Customs Procedures (Kyoto Convention, Kyoto, 1973). Belarus is expected to enter the World Trade Organization (hereinafter, the “WTO”).

In addition, Belarus is a party to the Customs Union. For this reason, the unified customs legislation of the Customs Union, including the Customs Code of the Customs Union (hereinafter, the “Customs Code”), is directly applicable in Belarus.

Customs Union of Belarus, Kazakhstan and Russia
The Customs Union was established in 1995. The main provisions of Customs Union legislation, however, were introduced only in 2009–2010. The Customs Union actually started to function on 1 January 2010 when the Unified Customs Tariff (a set of import duties applied by all three member-states) and the unified system of non-tariff measures (licensing requirements on importation) were adopted.

The most significant changes took effect on 1 July 2010, when the Customs Code of the Customs Union and other important international treaties went into effect. Currently, goods manufactured or released for domestic consumption in one participating country can circulate in the others free of customs clearance and without payment of customs duties and VAT or any economic limitations. Such goods do not have to be placed under customs procedures.

There are several exceptions to the Customs Union rules. Certain goods must still be declared to the customs authorities when they are imported from one member-state to another.

Import duties
Imported goods are generally subject to import customs duties and import VAT. Certain categories of goods (such as alcohol, tobacco and gasoline) are also subject to excise duties (see the section “Other republican taxes” above).

Customs duty rates generally vary from 0% to 80% of the customs value of the goods. VAT is payable at the standard rate of 20%, which is calculated on the basis of the customs value and the customs duty. Import VAT paid by the importer is generally creditable against its output VAT.

The current customs tariff sets zero duty rates for books, some kinds of medicines, certain technological equipment and other goods. Humanitarian aid, goods needed to rectify the consequences of natural calamities, accidents or disasters as well as diplomatic goods are exempt from customs duties and VAT.

Export duties
Certain categories of goods (e.g., oil and petroleum products) are subject to export customs duties.

Customs value
Customs valuation in Belarus is based on WTO rules. The customs value of imported goods is usually determined as the value of the goods as indicated in the invoice plus certain other costs related to the importation of the goods, but not included in the transaction price. These additional costs are typically the costs of delivery of the goods to the border (e.g., transportation and insurance costs), royalties or other payments for the use of intellectual property, the costs of materials provided free of charge by the purchaser to the seller, etc. This method of calculation of the customs value of imported goods is called the transaction value method.

Normally, the customs value is based on CIP delivery terms (Incoterms 2010 – Carriage and Insurance Paid To). If the customs value cannot be estimated using the transaction value method, other methods may apply: the price of a transaction involving identical or similar goods, the deduction cost method, the summation cost method, or the reserve method.
Customs coding

At present, the Unified Customs Nomenclature of the Customs Union applies in Belarus. This nomenclature is based on the Harmonized Commodity Description and Coding System of goods. In principle, the first six digits of the commodity code should be identical in Belarus and in the EU, although there are sometimes differences in practice. It is possible to obtain a binding decision from the customs authorities concerning the classification of goods.

Customs procedures

All cross-border transfers of goods and vehicles in Belarus are carried out under one of the customs procedures prescribed by the Customs Union legislation. Each customs procedure provides different terms for clearance. This has a considerable effect on the tariff and non-tariff barriers under import and export transactions. Below is a summary of the main customs procedures.

Release for domestic consumption

The customs procedure for release for domestic consumption is used when goods are imported into Belarus without the intention to re-export them. This is the most frequently used and the most straightforward procedure. Under this procedure, after the payment of customs duty, import VAT and customs clearance fees, the goods are in free circulation in the Customs Union.

Bonded warehouse

When goods are imported under the bonded warehouse customs procedure, they are kept in a special warehouse under the supervision of the customs authorities (customs bonded warehouse). The goods are kept under supervision until their sale to the final customers, their final use in the Customs Union or their re-exportation outside the Customs Union. The payment of customs duties and import VAT is postponed until the goods are removed from the customs bonded warehouse and sold to the final customers in the Customs Union.

Goods kept in a customs bonded warehouse must remain in an unchanged condition, i.e., it is prohibited to manufacture, assemble or transform goods stored in a customs bonded warehouse.

The period of storage of goods in a customs warehouse cannot exceed three years. After the expiration of the storage period, the goods should be placed under another customs procedure. If the goods are released for domestic consumption, customs duties and VAT are due. If the goods are re-exported outside the Customs Union, no customs duties or import VAT are due.

Temporary importation

The temporary importation procedure is the customs procedure under which the use of goods in the Customs Union is permitted with full or partial exemption from customs duties and import VAT.

The time period for temporary importation cannot exceed two years (or 34 months for leased fixed assets).
The full exemption is granted in limited cases for goods that are intended to be used in non-sales operations. Typical examples of temporary importation with full exemption are the importation of goods for an exhibition or for testing in the Customs Union.

The partial exemption is granted in other situations when it is intended that the goods will be maintained in the Customs Union for a limited period of time and re-exported afterwards. Under the partial exemption, the importer has to pay customs payments in monthly installments of 3% of the total amount calculated as if the goods were released for free circulation. These amounts are not refunded if the goods are re-exported.

Once the period of temporary importation has expired, the goods can be either re-exported out of the Customs Union or released for domestic consumption in the Customs Union. If the goods are finally released for domestic consumption, the outstanding customs payments should be paid together with late payment interest.

This procedure is widely used in practice, in particular in the case of importation for leasing in Belarus as well as by general contractors for construction projects.

Customs processing procedures

There are three different processing procedures.

Customs processing procedure on the customs territory. Companies use this procedure if their business involves processing goods in the Customs Union. Under certain conditions, they can import goods into the Customs Union for processing without payment of customs duty and import VAT. A bank guarantee may be required to secure the payments of customs duties and taxes that can be due in case of violation of the conditions for this procedure.

Once the goods have been processed and constitute finished products, they should be exported. If the finished products are released for domestic consumption in the Customs Union, customs duty and import VAT are due on the value of the raw materials, as is late payment interest.

Processing of goods for domestic consumption. Under this customs procedure, customs duties are due only once the finished products are released for domestic consumption in the Customs Union territory. Customs duties apply to the finished goods. Imported raw materials for processing are exempted from customs duties, but are subject to import VAT. This procedure is available only for certain types of finished goods, the list of which is to be determined by legislation.

Processing of goods outside the customs territory. The procedure of processing of goods outside the Customs Union allows them to be exported for processing and subsequent re-importation into the Customs Union. Customs duties and
import VAT are due only on the value added by the processing operations, but not on the value of the imported goods. This procedure is very useful for goods that need to be exported for repair outside the Customs Union.

**CIS free trade regime**
The free trade regime that is currently in force in the CIS means that customs duties are not applicable to the import of goods originating from the CIS countries to Belarus. It is necessary to import goods from another CIS country under an agreement between two CIS residents in order to use this benefit. VAT and excise duties are charged in this respect. Eight CIS countries (Belarus, Russia, Armenia, Kazakhstan, Kyrgyzstan, Moldova, Tajikistan and Ukraine) signed the Free Trade Zone Treaty in St. Petersburg on 18 December 2011. Uzbekistan announced its intention to be a party to the treaty. The treaty took effect on 20 September 2012. On 31 May 2013, the parties signed a protocol with Uzbekistan on the implementation of the Free Trade Zone Treaty.

The Free Trade Zone Treaty abolishes import and export duties. It provides guarantees of the nondiscriminatory application of nontariff regulations and the national regime.

The document also provides for the abolition of quantitative restrictions in mutual trade and equalizes the parties in their rights in the event of state procurements. It also envisages freedom of transit and the possibility to apply special protective measures in mutual trade. It regulates the issues of providing subsidies, establishing technical trade barriers, applying sanitary measures and introducing restrictions to ensure the balance of payments.

The Free Trade Zone Treaty replaced the current bilateral and multilateral free trade agreements between the member-countries.

The treaty differs significantly from the agreements effective in the CIS because it has an instrument obliging parties to honor their commitments if they do not meet their contractual obligations. The rules for resolving disputes, which are in the appendix to the treaty, are such an instrument.

---

**Financial reporting and auditing**

The general provisions of the accounting standards, including the Law on Accounting and Reporting, envisage that the main aim of accounting is to establish full and accurate information about the activity of a company and its assets and liabilities.

The Law on Accounting and Reporting applies to legal entities of Belarus, branches, representative offices and other autonomous subdivisions with a separate balance sheet, foreign companies’ representative offices, business groups, holdings, and simple partnerships (parties to a joint venture agreement).

Foreign companies’ representative offices in Belarus base their accounting policy on the accounting and reporting principles stipulated in the Law on Accounting and Reporting.

The Law on Accounting and Reporting does not apply to self-employed entrepreneurs, who are regulated by other legal acts.

The new Chart of Accounts and instructions on its application, as well as other regulatory documents based on International Financial Reporting Standards (IFRS), took effect on 1 January 2012. This allows for a gradual transition to the new accounting methodology and the reconciliation of Belarusian accounting with IFRS.

---

**Key concept**

Accounting and reporting are based on principles of a going concern, autonomy, accrual, correspondence of income and expenses, accuracy, prudence, neutrality, completeness, comprehensibility, comparability and relevance.

The application of these principles, however, may differ from the application that is common in other countries. For example, in practice Belarusian accounting tends to focus on form rather than substance; the laws are very specific as to the documents required to support a transaction. This emphasis on the legal form may override the application of other accounting principles.
The going concern issue is relevant in this emerging market due to the possibility that some companies may not continue their economic activity in their current financial position.

Accounting methods
Belarusian companies should base their accounting on the policy approved by the director’s order on an annual basis. The policy stipulates the types of accounting estimates to be used, the company’s chart of accounts, primary accounting forms developed for use by the company, the form of accounting used by the company, the procedure for taking inventory of assets and liabilities, and other means of organizing and maintaining accounts that the company will use throughout the year.

Effective 1 January 2013, companies use only the accrual method to recognize proceeds from sales of products, goods, work performed and services rendered (proceeds are recorded in the reporting period in which the transactions were actually made, regardless of the date of settlement).

Foreign-currency operations
Companies should post accounting entries and prepare financial statements in the official currency of Belarus.

For accounting purposes, companies recalculate business operations in foreign currency in Belarusian rubles at the NBRB’s official currency rate as of the day of business operation. The NBRB determines the exchange rate of the most widely used foreign currencies on the basis of trading on the Belarusian Currency and Stock Exchange during the previous day.

Generally, companies buy and sell foreign currency on the Belarusian Currency and Stock Exchange, but in certain limited cases its involvement is not required.

Fixed assets
Fixed assets are recognized at their initial or reappraised value. One of the following methods can be used to depreciate fixed assets:

- Linear method
- Nonlinear method (calculated by the direct sum-of-the-years’ method, the inverse sum-of-the-years’ method or the diminishing balance method with an acceleration multiplier of 1 to 2.5)
- Production method.

A company independently determines the methods of accruing depreciation and indicates them in its accounting policy.

The linear method is the most frequently used. Companies define a fixed asset’s useful life on the date of its acquisition. The useful life frequently corresponds to a fixed asset’s presumed lifespan, which can be adjusted if the fixed asset’s state changes. Although the methods and means of charging depreciation can be chosen somewhat freely, the range of available options has become narrower due to several legislative restrictions.

Fixed assets, construction-in-progress and uninstalled equipment (which is considered noncurrent assets) are reappraised on the basis of an index published by the Belarusian National Statistical Committee. If this index attains the level of 103% or more, a reappraisal is done:

- For buildings, structures and transmitters – by all companies
Doing business in Belarus

• Companies

For other fixed assets, construction-in-progress and uninstalled equipment – by state companies and companies with over 50% of state equity (unless they are commercial companies with foreign investments).

A company must reappraise its fixed assets annually (at the beginning of the year following the reporting year). It must use one of the following three acceptable methods:

- Direct appraisal method
- Index method
- Currency value conversion method.

A group of similar fixed assets can be reappraised not more than once a year. Land and other natural units do not require reappraisal.

For accounting purposes, companies can set an asset's useful life within the thresholds established by law. When legislation allows companies to make a revaluation, the decision to make it may be adopted with regard to:

- The entire property, except for buildings, structures and transfer mechanisms
- Fixed assets which belong to certain groups and subgroups or which are classified by certain fixed asset codes
- Certain fixed assets and uninstalled equipment
- Construction-in-progress with regard to all the costs concerning the unit to be reappraised.

Inventories

Companies recognize inventories at their actual cost. When inventories are released into production or otherwise disposed of, they are assessed using one of the following methods:

- Average cost
- Cost of the first inventories to be acquired (FIFO)
- Cost of each unit.

One method for a group (type) of inventories is used during the reporting year, as determined in a company's accounting policy.

The first method is the most frequently used. The actual cost of inventories should include the cost of inventories at their purchase prices, including customs duties and levies, as well as the company's actual expenses for having the inventories delivered and rendered suitable for use.

Disclosure requirements

Companies must prepare annual statements and, in cases stipulated by the laws of Belarus, interim (quarterly, monthly) statements.

Commercial organizations’ annual and interim statements (with the exception of monthly statements) consist of:

- Balance sheet
- Profit-and-loss statement
- Equity statement
- Cash flow statement
- Notes on the statements, as required by the laws of Belarus.

Commercial organizations’ monthly statements consist of the balance sheet.

The Finance Ministry establishes the format for financial statements' presentation. Financial statements are drawn up in the Belarusian and/or Russian languages. The reporting currency is the official currency of Belarus.
Reporting requirements

The reporting year for all (except newly formed) companies is the calendar year from 1 January to 31 December. For newly formed companies, it is from the date of their state registration to 31 December of the same year.

Companies present annual financial statements by 31 March of the year following the reporting year to the following:

- Owners of the companies' assets
- State bodies and organizations that have jurisdiction over them
- Other organizations in cases stipulated by the laws of Belarus.

The annual financial statements should be considered and approved as prescribed by a company's foundation documents.

Public-interest entities (open joint stock companies that are founders of unitary enterprises and/or parents of subsidiary companies, banks and nonbanking credit and financial institutions, and insurance companies other than banks) must prepare annual consolidated IFRS statements in the official currency of Belarus for 2016 and subsequent years. The annual statements of such organizations, along with a related audit report, must be submitted by 30 June of the year following the reporting year to the Ministry of Finance of the Republic of Belarus (in the case of banks, to the National Bank of the Republic of Belarus) and posted on the Internet site of the public-interest entity by 31 July of the year following the reporting year.

Annual financial statements of the following companies should be made public:

- Banks and nonbanking credit and financial institutions
- Insurance and reinsurance companies, insurance brokers
- Open joint-stock companies
- Issuers of securities.

All companies registered with the Belarusian Currency and Stock Exchange present quarterly financial statements (balance sheet, profit-and-loss statement, etc.) and additional information to the Finance Ministry within 30 calendar days after the end of the quarter. They also present annual financial statements within 30 calendar days after the end of the financial year.
Audit requirements
Financial statements of the following companies are subject to obligatory audit:
- Open joint-stock companies
- Banks and nonbanking credit and financial institutions
- Stock exchanges
- Commercial companies with foreign investments
- Insurance companies and insurance brokers
- HTP residents
- Companies responsible for the payment of guaranteed reimbursements of bank deposits belonging to individuals
- Other companies and individual entrepreneurs who earned over EUR5 million in the previous reporting year.

Discrepancies between IFRS and the Belarusian statutory accounting principles
The Belarusian requirements for commercial companies are based on the Civil Code, the Law on Accounting and Reporting, the company’s chart of accounts, incorporate accounting regulations and legal acts of the Finance Ministry and the NBRB. While a number of requirements formally follow IFRS, their application and interpretation may be materially different.

Despite the existence of accounting standards in the banking system and in legal acts of the Finance Ministry, Belarusian statutory accounting depends on various orders and letters issued by the Finance Ministry and the NBRB that prescribe accounting methods and approaches.

These and other circumstances may result in departures from the standard requirements and consequently in more inconsistencies with IFRS in addition to those outlined below. The major differences are as follows:
- Definition of reporting and functional currency (financial statements for Belarusian statutory purposes must be prepared in the official currency of Belarus only)
- The mandatory existence of supporting documentation prepared in accordance with the prescribed format for both accounting and tax purposes
- The impact of hyperinflation is not reflected in the Belarus accounting system
- In spite of the existing guidance for the preparation of consolidated financial statements, which requires that the parent company prepare separate and consolidated financial statements if it has subsidiaries, the order is not fully complied with and enforced. With IFRS, on the other hand, the consolidation concept must be fully applied
- The regular revaluation of entire classes of fixed assets under the Belarusian statutory accounting principles is allowed under the prescribed rules
- Differences in the accounting for equity and reserves
- Accounting and reporting in the banking system is more developed in terms of IFRS concepts (e.g., goodwill).

The use of different national statutory accounting standards and legal acts makes the comparison of opportunities and financial decisions more difficult and costly for the potential investor or user of the financial statements. Differences in accounting standards between IFRS and the Belarusian statutory accounting principles also impose additional costs on companies that must prepare financial information based on multiple reporting models in order to raise capital in different markets. The differences also create potential confusion as to which numbers are real. Both the gradual transition to IFRS under the guidance of the Council of Ministers and the future adoption of new laws on the preparation of consolidated financial statements in accordance with IFRS are extremely important steps for the development of accounting in Belarus and for the global convergence of accounting principles.
Individuals
The Belarusian labor market has become, to a large extent, an employee's market. The lack of qualified employees in some industries has become critical, making for intense competition. There are a variety of reasons for this, including a decrease in the Belarusian population and a certain loss of educational level. Together, these factors have led to a decrease in the qualified labor force in Minsk and other regions.

The situation radically changed fairly recently due to the economic crisis. Many companies have had to reduce their headcount or introduce part-time employment in addition to cutting employee benefits.

The Belarusian Labor Code
The Belarusian Labor Code (hereinafter, the “Labor Code”) forms the basis of labor relations in Belarus. It establishes procedures for the hiring and dismissal of employees, as well as regulations concerning working time, vacations, business trips, salary payment, etc. The Labor Code continues to be very protective of employees. The Decree of the Belarusian President No. 29 of 26 July 1999 operates along with the Labor Code and sets the details of fixed-term employment agreements.

Belarusian labor law covers not only Belarusian citizens, but also expatriates working in Belarus, provided that the employment agreement is entered into in Belarus.

Normal working hours in Belarus are eight hours per day and 40 hours per week. Belarusian law is stringent in limiting overtime hours. Under the Labor Code, overtime work may technically be required only with the employee's consent and should be compensated at an increased rate or by provision of additional days off. The maximum duration of overtime work within a year is 180 hours, provided that an employee does not work more than 10 hours of overtime per working week. A working day which includes overtime work should not be longer than 12 hours. It is possible to establish a non-standard work schedule without fixed hours, but the employee must then be provided with up to seven days of additional annual vacation.

In general, employees must be granted at least 24 calendar (as opposed to working) days of paid vacation a year.

Maternity leave (generally 126 days) is compensated by the Social Protection Fund usually in the amount of 100% of average salary, but it shall not exceed triple the amount of the average salary set by legislation. Upon giving birth to a child, mothers are entitled to receive a onetime allowance of approximately USD1,100. Employees are also eligible to take childcare leave to take care of a child until he or she reaches the age of three years. In this case, the employer will have to pay a monthly allowance of about USD200 per month, which is financed by the Social Protection Fund.

Employees are also compensated for periods of illness by the Social Protection Fund: 80% of their average salary for working days of the first six calendar days of illness and 100% for the rest of the days of illness.

Labor regulations in Belarus guarantee additional vacation time and several other benefits for individuals working in hazardous and/or dangerous conditions.

Recruitment
In addition to a written employment agreement with an employee, recruitment must be supported by internal documentation through the issuance of a formal appointment order by the employer. This order states the name, position and date of appointment of the new employee. According to the labor law, it is normal for an employment agreement to be entered into for an indefinite term.

In fact, entering into a fixed-term employment agreement under the above-mentioned Decree No. 29 is used even more often in Belarus because it provides notable benefits for employers. These benefits include, inter alia, the possibility of entering into an agreement for one year (and up to five years) irrespective of the employer's industry and the type of work to be done, as well as broader grounds for an employer to terminate a contract on its own initiative.

An employer hiring an employee may usually establish a probation period with a maximum duration of three months.

The employer is also responsible for the proper maintenance of labor books for each employee. If the place of employment is the first one for the employee, the employer must fill in a labor book and apply for a Social Security Card for the employee.
Termination
An employee may be terminated for one of the reasons listed in the Labor Code. The procedure for termination is also provided in the Labor Code and should be strictly followed to reduce the risk of challenge in court. The Labor Code provides for the following general grounds for employment termination:

- Mutual consent of the parties
- The expiry of the term of the employment agreement (in case of a fixed-term agreement)
- The employee’s initiative
- The employer’s initiative
- Circumstances beyond the parties’ control (force majeure) and other reasons.

As for the employer’s right to terminate the employment agreement, the employer may terminate employment only if certain conditions are met. An employment agreement may be terminated by the employer in the event of certain violations committed by the employee or a repeated failure by the employee to perform his or her job duties properly. The employer may also terminate an agreement in the case of events such as the liquidation of a company, staff reduction, and the unsuitability of the employee for the position held or work performed. In the latter case, the unsuitability should be confirmed by the results of attestation, which is also a statutory regulated procedure.

The Labor Code envisages the right of the employer to terminate an employment agreement with an employee during the probation period if the results of the probation are unsatisfactory. The employer must give at least three days’ notice in case of early termination. It is also possible to give notice on the last day of the probation period.

Remuneration
The remuneration of employees depends on their level of qualification and the complexity, content, specifics and general conditions of the work.

Until recently, commercial companies and individual entrepreneurs were obliged to use the Unified Wage Tariff system to calculate remuneration. This restrained competition on the labor market. Since 1 June 2011, commercial companies (both state and private) and individual entrepreneurs are no longer obliged to apply the Unified Wage Tariff system and may use it in their own discretion.

The Unified Wage Tariff system is a tool for setting tariff rates on the basis of a system of wage grades and corresponding tariff indexes. Based on the Unified Wage Tariff system, an employer must set a unified first rate tariff that will be multiplied by the tariff index for employee salary settings.

At present, many employers have begun to establish salaries and wages without using the Unified Wage Tariff system (e.g., in the Belarusian ruble equivalent of conventional units or foreign currency). Salaries and wages must be paid in Belarusian rubles irrespective of the established procedure for determining them.

Work under a civil law agreement
Besides an employment agreement, an employee can also enter into a civil law agreement for performing work or providing services. The Labor Code does not apply to such agreements. The Civil Code and Presidential Decree No. 314 of 6 July 2005 regulate civil law agreements and the legal relations arising from them. Certain guarantees provided under the Labor Code, including paid leave, do not apply to relations that arise from civil law agreements.

A civil law agreement must be in writing and provide for, inter alia, the following items:

- A procedure for settlements by the parties, including the amounts to be paid
- The obligation of the client (in other words, of the employer) to pay social security contributions for individuals (in other words, for employees)
- Obligations of the parties to ensure safe working conditions and liability for failing to maintain them
- Grounds for the early termination of the civil law agreement
- Obligations on the part of the client to pay a penalty amounting to at least 0.15% of the unpaid amount for every day of delay if the client fails to pay on time.
Migration

Entering and staying in Belarus for foreign individuals

To enter Belarus, a foreign citizen must obtain a visa. Different types of visas are outlined below.

Foreign citizens must register within five days of entering the country, not including weekends and holidays. A foreigner must register either with the Ministry of Foreign Affairs, the department for internal affairs, the hotel or the health resort organization at the place of actual temporary stay. Russian and Kazakh nationals must register within 30 days.

Foreign citizens who have a valid permanent residency permit don’t need to obtain any visa to enter and exit Belarus.

I. Entry visas

The entry visa gives a foreign national the right to enter, stay in and depart from Belarus. As a rule, it is issued by Belarusian diplomatic missions and consulates in foreign states. A foreign national can also apply for a Belarusian visa in the airport upon arrival.

Entry visas are classified into transit visas (issued for transit across Belarus), short-term visas (issued for up to 90 days) and long-term visas (issued for up to one year with the right to stay for 90 days). There are single-, double- and multiple-entry visas.

Short-term entry visas (category “C”) are issued for the requested period, but for not more than 90 days, inter alia, for the following purposes:

- A business trip, on the basis of an invitation from a Belarusian legal entity
- Private matters, on the basis of, inter alia, an invitation from an individual
- Work (with the right to work by hire), on the basis of a special permission to work by hire.

A long-term entry visa (category “D”) is issued for multiple entries into Belarus, inter alia, for the following purposes:

- Maintaining business contacts, on the basis of a request from a Belarus legal entity and other visa-support documents confirming the existence of business contacts with the host company
- Private matters, on the basis of, inter alia, an invitation from an individual.

II. Temporary residency permit

A temporary residency permit is a document that allows a foreign national to reside in Belarus during its validity.

A foreign citizen may obtain a temporary residency permit, inter alia, if he or she comes to Belarus to work or carry out entrepreneurial activity. A temporary residence permit is given for a period of up to one year and allows foreign nationals to stay in Belarus without a visa. A temporary residence permit may also be issued to family members of a foreign national who has received a temporary residency permit, provided that there is a legal source of income that will allow the foreign national and his or her family members to maintain a minimum subsistence level as established in Belarus during his or her temporary residence.

III. Visa for exiting and entering Belarus

A foreigner who has a temporary residency permit can periodically leave Belarus and re-enter if he or she has a valid visa.

If an entry visa has expired, a foreigner can receive an exit-entry visa. It is issued by the Citizenship and Migration Department of the Ministry of Internal Affairs at the place of the foreigner’s temporary residence.

A multiple exit-entry visa is issued to foreign nationals who have received a temporary residence permit for one year, but for not longer than the validity period of the temporary residency permit.

Employment of foreign individuals

The employment of a foreign individual who has no permanent residency permit and intends to come to Belarus for the purpose of employment must undergo a multi-stage procedure that both the employer and the foreign individual must complete.

The employment of foreign individuals includes the following steps:

- The employer receives a permit to engage foreign manpower (see the section “Permission to attract foreign human resources” below)
- The employer receives a special permit for each foreign employee to work in Belarus (see the section “Special permission to work for hire in Belarus for a particular employee” below)
- The employer concludes an employment agreement with the employee
and registers it (see the section “Registration of labor agreements (contracts)” below)

- The employee receives a Belarusian entry visa (see the section “Entry visas” above)
- The employee is registered with the local bodies of internal affairs upon arrival in Belarus. Subsequently, the employee may obtain a permanent residence permit (see the section “Temporary residency permit” above).

I. Permission to attract foreign human resources

To engage over 10 foreign citizens, a Belarusian employer must obtain permission to hire foreign human resources in Belarus.

To receive this permission, the employer must submit original and notarized copies of all required documents to the Citizenship and Migration Department of the Ministry of Internal Affairs. The permission is valid for one year.

II. Special permission to work for hire in Belarus for a particular employee

After the above permission is obtained (if required), the Belarusian employer should obtain special permission for each employee to work for hire in Belarus. If a foreign individual plans to work for several Belarusian employers, he or she must receive a special permit to work for each of them.

The Belarusian Ministry of Internal Affairs issues this permission for a period of one year, and it may be extended by one year.

III. Registration of employment agreements

The employer must register the labor agreements (contracts) within one month of their signing. The term of validity of the labor agreement must not exceed the term of the validity of the special permission for employment.
Personal income tax

Taxpayers
Individuals pay personal income tax (hereinafter, “PIT”).

Taxation objects
The following are subject to PIT:
- Income from sources inside and outside Belarus received by Belarusian tax residents
- Income from sources in Belarus received by Belarusian tax nonresidents.

Belarusian tax residents are individuals who have been on Belarusian territory for more than 183 days in a calendar year. Individuals who do not meet that requirement are tax nonresidents.

Income from sources in Belarus
Income from sources in Belarus includes:
- Salaries for the performance of work, the provision of a service and the performance (non-performance) of an operation
- Pension, benefits, stipends and other similar payments received in accordance with Belarusian legislation
- Dividends and interest received from a Belarusian company and/or interest received from a Belarusian individual entrepreneur and/or a foreign company in connection with its activity through a permanent establishment in Belarus
- Insurance compensation and/or support in the event of an insurance case received from a Belarusian insurance company and/or a foreign company engaged in activity through a permanent establishment in Belarus
- Income from intellectual property use in Belarus
- Income from the lease or other use of Belarusian immovable property
- Income from the sale of Belarusian territory of securities or shares (participatory interest in the charter capital of companies) and income from the sale of Belarusian shares (participatory interest in the charter capital of Belarusian companies), etc.

Procedure for tax levying
In most cases, tax agents calculate, withhold and transfer PIT to the budget for their employees. Tax agents are Belarusian companies, Belarusian individual entrepreneurs, foreign companies engaged in activity in Belarus through a permanent establishment, permanent establishments of international organizations in Belarus, and diplomatic missions and consulates of foreign states in Belarus from which the taxpayer has received income.

Tax agents transfer PIT to the budget not later than the day following the day on which the income was paid.

Individuals have to submit a tax return to the tax authorities and pay PIT themselves in the following cases:
- When income is received from individuals who are not tax agents
- When income is received by a Belarusian tax resident from a source outside Belarus
- When tax agents do not withhold income tax from an individual’s income
- When income is received from entrepreneurial activity after an individual entrepreneur has lost his status.

Individuals submit an annual tax return not later than 1 March of the year following the reporting calendar year and pay the tax not later than 15 May of the year following the reporting year.
Tax deductions

PIT payers may apply tax deductions as follows:

- In the amount paid for education in Belarusian educational institutions when receiving a first higher, a first secondary specialized or a first vocational technical education, and also in the amount used to repay loans received from Belarusian banks and/or from Belarusian companies and/or from Belarusian individual entrepreneurs (including interest in the majority of cases). The amounts paid by a taxpayer to train persons closely related to him or her are also deductible.

- In the amount that does not exceed BYR12 million (approximately USD1,200) during a tax period, paid as insurance premiums under voluntary life insurance and additional pension agreements entered into for at least three years, and under agreements for voluntary insurance of medical expenses.

- In the amount of the expenses actually borne by the taxpayer and his or her family members who are registered as persons in need of better living conditions in connection with construction, including by acquiring housing bonds or a single-family house or apartment in Belarus, and to repay loans to Belarusian banks and/or to Belarusian companies and/or to Belarusian individual entrepreneurs (including interest in the majority of cases).

- In the amount of the documented expenses actually incurred on the acquisition and/or payable alienation of property (except for the sale of securities and fixed-term financial instruments).

These tax deductions are granted by the tax agent (employer at the main place of work) or by the tax authorities when an individual submits a tax return.

A taxpayer may apply several standard tax deductions. For example, most taxpayers may apply a standard tax deduction of BYR630,000 (approximately USD63) per month if they receive income of not more than BYR3.83 million (approximately USD383) per month and of BYR180,000 (approximately USD18) per month for each child up to the age of 18 and/or each dependent.

Tax exempt income

The following income of Belarusian tax residents is exempted:

- Benefits for state social insurance and state social security, except for temporary disability benefits (e.g., there is no income tax on maternity and childcare benefits until the child is three years old) and unemployment benefits.

- Pension received according to Belarusian legislation and/or the legislation of foreign states.

- All types of compensation envisaged by legislative acts and resolutions of the Council of Ministers (except for compensation for unused work leave and the deterioration of transport vehicles, equipment, instruments and devices belonging to an employee).

- The amounts of material aid provided in accordance with legislation.

- Income from individuals who are not individual entrepreneurs that is not over BYR37.835 million (roughly USD3,783), and in the amount received from all sources during the tax period as gifts or gratuitously as real estate under a rental agreement.

- Income from the payable alienation of one house, one apartment, one cottage and one land lot (or other similar real estate) within five calendar years.

- Income from the payable alienation of one automobile within one calendar year.

- Income from the sale of inherited property.

- Income from the sale of other assets (subject to certain limitations).

- Alimony payments and other types of income.
### Payroll taxes

#### Examples of payroll tax calculation

The example is prepared on the assumption that a company employs a qualified welder at EUR24,000 gross per annum.

* For calculation, we used the average salary in Belarus for March 2014, which amounted to BYR5,794,155 and the NBRB official exchange rate of BYR13,840 for EUR1.
Individuals independently paying social security contributions (not commented on in this brochure).

**Objects of social security contributions**

All payments in cash or in nonmonetary form are subject to social security contributions, including payments upon civil law contracts. The tax base for social security contributions is limited by four average salaries in Belarus for the previous month.

The relevant legislative act stipulates types of payments which are exempt from social security contributions. Certain types of material aid, compensation and one-time payments are among these payments.

Foreign citizens may refuse to participate in the state social security program. In this case, a company does not pay social security contributions

**Social security contribution rates**

Taxpayers pay the following social security contributions as a single payment:

- Social security contributions for retirement, disability and loss of a breadwinner (pension insurance) – 29%. These contributions include 28% paid by the employer and 1% by the employee; in this case, an employer directly withholds and transfers the tax

- Social security contributions for temporary disability, maternity, etc. – 6%

Other social security contribution rates for retirement, disability and loss of a breadwinner are set for certain categories of taxpayers (e.g., employers engaged in agricultural production, consumer cooperatives, social associations for disabled persons, etc.).

**Payment of social security contributions and report submission**

Taxpayers file a report on social security contributions quarterly not later than the twentieth of the month following the reporting quarter.

Taxpayers providing work under employment contracts pay contributions not later than the day set for paying salaries for the preceding month. Taxpayers providing work under civil law contracts pay contributions during days when remuneration is paid under the contracts, but not later than the day set for paying salaries for the preceding month.

Companies that have less than 100 employees during the calendar year pay contributions quarterly, but not later than the day set for paying salaries for the last month of the reporting quarter.

**Compulsory insurance contributions to the Belarusian Republican Unitary Insurance Enterprise “Belgosstrakh” for work-related injuries and occupational illnesses**

The tax base is all types of payments made to individuals subject to compulsory insurance against work-related injuries and occupational illnesses. Contributions are not charged for payments that are exempt from social security contributions.

The payroll serves as the tax base for compulsory insurance against work-related injuries and occupational illnesses. The tax rate is 0.6%. The Belarusian Republican Unitary Insurance Enterprise “Belgosstrakh” may increase or decrease the rate for each taxpayer depending on the type of professional risk.

Contributions are paid not later than the twenty-fifth of the month following the reporting quarter in which employees receive payment. Foreign citizens cannot refuse to participate in this compulsory insurance program.

Appendix 4: Withholding tax rates for companies that do not operate through a permanent establishment in Belarus, in accordance with double tax treaties

Belarus has double tax treaties with the following countries: Armenia, Austria, Azerbaijan, Bahrain, Belgium, Bulgaria, China, Croatia, Cyprus, the Czech Republic, Egypt, Estonia, Finland, Germany, Hungary, India, Iran, Ireland, Israel, Italy, Kazakhstan, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lithuania, Macedonia, Moldova, Mongolia, the Netherlands, North Korea, Oman, Pakistan, Poland, Qatar, Romania, the Russian Federation, Saudi Arabia, Singapore, the Slovak Republic, Slovenia, the Republic of South Africa, South Korea, Sri Lanka, Sweden, Switzerland, Syria, Tajikistan, Thailand, Turkey, Turkmenistan, Ukraine, the United Arab Emirates, Uzbekistan, Venezuela, Vietnam and Yugoslavia (effective for Serbia).

Belarus also signed a double tax treaty with Bangladesh, Indonesia and Libya, but they have not been ratified yet.

Belarus has double tax treaties as a legal successor to the USSR with the following countries: Denmark, France, Japan, Malaysia, Spain, Great Britain and the USA. According to the Ministry for Taxes and Levies, the treaties with Canada and Norway are no longer in force.

The following table gives the income tax rates for foreign companies in accordance with double tax treaties and effective Belarusian tax legislation.

---
(a) A 10% rate is applied when the recipient is the actual owner of dividends and owns at least 30% of the capital of the company that pays an income. Otherwise, a 12% rate is applied.

(b) A 5% rate is applied when the recipient is the actual owner of dividends and owns at least 30% of the capital of the company that pays an income. A 10% rate is applied in other cases when the recipient is the actual owner of dividends. Otherwise, a 12% rate is applied.

(c) A 3% rate is applied when the recipient is the actual owner of royalty concerning the amounts paid for the use or grant of the right to use patents, secret formulas or processes, or for information on industrial, business or scientific experience. A 5% rate is applied when the recipient is the actual owner of royalty concerning the amounts paid for the use or grant of the right to use industrial, business or scientific equipment. In all other cases, a 10% rate is applied when the recipient is the actual owner of royalty. Otherwise, a 15% rate is applied.

(d) A 5% rate is applied when the recipient is the actual owner of income and has invested at least 200,000 ECU in the equity of the company that pays the income. A 10% rate is applied when the recipient is the actual owner of income and owns at least 25% of the capital of the company that pays the income. Otherwise, a 12% rate is applied.

(e) A 5% rate is applied when the recipient of income is the owner of at least 25% of the capital of the company that pays the income. Otherwise, a 12% rate is applied. (In the case of the Netherlands, refer to note [w]).

(f) A 3% rate is applied to the amounts paid for the use or grant of the right of use of patents, trademarks, design, models, plans, secret formulas or processes, or for information on industrial, business or scientific experience. A 5% rate is applied to the amounts paid for the use or grant of the right of use of copyright for works of literature, art or science, including cinema films as well as films or recordings used in TV or radio programs. Otherwise, a 15% rate is applied.

(g) A 10% rate is applied when the recipient is the actual owner of income and owns at least 25% of the capital of the company that pays the income. Otherwise, a 12% rate is applied. (In the case of Pakistan and Turkey, there is no requirement for the recipient of income to be the actual owner of income in order to apply the 10% rate).

(h) An 8% rate is applied when the recipient is the actual owner of interest. Otherwise, a 10% rate is applied.

(i) A 5% rate is applied to the amounts paid for using the copyright of works of literature, art or science, including cinema films as well as films or recordings and other means for the transmission of images or sound. A 10% rate is applied to the amounts paid for patents, trademarks, designs, charts, models, plans, secret formulas or processes, for information on industrial, business or scientific experience, for the use or cession of the right to use industrial, business or scientific equipment, or for transport vehicles. Otherwise, a 15% rate is applied.

(j) A 5% rate is applied when the actual owner of dividends is a company owning USD100,000 or more in a company that pays dividends. Otherwise, a 10% rate is applied.

(k) A 5% rate is applied to the amounts paid for the use or grant of the right to use copyrights of scientific works, patents, trademarks, designs, models, plans, secret formulas or processes, for the right to use information on industrial, business or scientific equipment or transport vehicles, or for information on industrial, business or scientific experience. A 10% rate is applied to the amounts paid for the use or grant of the right to use copyrights for works of literature or art, including cinema films as well as films or recordings used in TV or radio programs. Otherwise, a 15% rate is applied.
(l) A 0% rate is applied when the recipient of the interest income is the government, a government body or a company that is fully owned by the state. A 5% rate is applied when the interest income recipient is a bank or other financial institution. Otherwise, a 10% rate is applied.

(m) A 5% rate is applied to the amounts paid for industrial, business or scientific equipment or transport vehicles. Otherwise, a 10% rate is applied.

(n) A 0% rate is applied to the amounts paid for the use or grant of the right to use copyrights of works of literature, art or science, including cinema films as well as films or recordings used in TV or radio programs. A 10% rate is applied to the amounts paid for the use or grant of the right to use patents, trademarks, designs, charts, models, plans, secret formulas or processes, for information on industrial, business or scientific experience, and for the use or grant of the right to use industrial, business or scientific equipment. Otherwise, a 15% rate is applied.

(o) A 10% rate is applied when the recipient is the actual owner of royalty concerning the amounts paid for the use or grant of the right to use patents, trademarks, designs, models, plans, secret formulas, processes, or copyrights of scientific works; for the use or grant of the right to use industrial, business or scientific equipment; and for the use or grant of the right to use information on industrial, business or scientific experience. Otherwise, a 15% rate is applied. Otherwise, a 10% rate is applied.

(p) A 0% rate is applied to interest income from the sale on credit terms of industrial, commercial or scientific equipment or when the interest income recipient is the government, the central bank, local government bodies or financial institutions performing state functions, or when interest is paid on loans that are guaranteed or indirectly financed by those bodies or institutions.

(q) Belarus abides by the double tax avoidance treaty between the former USSR and that state. The table shows the tax rates in compliance with the treaty.

(r) A 0% rate is applied to interest on bank and commercial loans. Otherwise, a 10% rate is applied.

(s) A 0% rate is applied to interest on government-guaranteed loans.

(t) A 0% rate is applied when the interest income recipient is a government, a local government body or the central bank. A 5% rate is applied when the recipient and the actual owner of interest income is a bank or other financial institution or when interest is paid as any industrial, business or scientific equipment is sold on credit terms. Otherwise, a 10% rate is applied.

(u) A 0% rate is applied when the recipient of interest income is a government, local government body, central bank or other financial institution that is wholly state-owned. Otherwise, a 10% rate is applied.

(v) A 0% rate is applied when the interest income recipient is the government or the central bank. (In the case of Turkey, a 0% rate is also applied when interest accrues in Belarus and is paid by Eximbank of Turkey on loans for the purchase of industrial, business, commercial, medical or scientific equipment). Otherwise, higher rates are applied.

(w) A 0% rate is applied when one of the following requirements is met:
   - The dividend recipient owns more than 50% of the dividend-paying company's capital, provided that the dividend recipient's contribution to the company's capital is at least 250,000 ECU
   - The dividend recipient owns over 25% of the dividend-paying company's capital, and its contribution to the company's capital is guaranteed or insured by the government.

(x) A 0% rate is applied when the dividend recipient is the government, the central bank, other government agencies, or financial institutions. Otherwise, a 5% rate is applied.

(y) A 0% rate is applied to the amounts paid for the use or cession of the right to use copyrights for works of literature, music, art or science, except for cinema films as well as films or recordings used in TV or radio programs. Otherwise, higher rates are applied.
(z) A 0% rate is applied when one of the following requirements is met:
- A loan was approved by the government
- Interest is charged on the sale on credit terms of industrial, medical or scientific equipment and related services
or
- A loan intended to promote export that involves the delivery of industrial, medical or scientific equipment and related services has been granted, insured or guaranteed by the state.
Otherwise, a 10% rate is applied.

(aa) A 0% rate is applied when one of the following requirements is met:
- A loan was approved by the government
- Interest was received due to the sale on credit terms of industrial, commercial, medical or scientific equipment
or
- Interest income is interest on state securities.
A 5% rate is applied to interest income relating to bank loans. An 8% interest rate is applied when the recipient is the actual owner of interest income. Otherwise, a 10% rate is applied.

(bb) A 0% rate is applied when a loan has been approved by the government.

(cc) A 5% rate is applied only to the amounts paid for using copyrights of works of literature, art or science (except for cinema films) or the right to use industrial, commercial or scientific equipment or transport vehicles. A 10% rate is applied when the recipient is the actual owner of royalties. Otherwise, a 15% rate is applied.

(dd) A 5% rate is applied when the recipient is the actual owner of income and owns over 20% of the income-paying company’s capital, and has made a contribution of at least EUR81,806.70. Otherwise, 12% is applied.

(ee) A 0% rate is applied when interest originates in Belarus and is paid to the government of the Federal Republic of Germany, to the bank Deutsche Bundesbank, the bank Kreditanstalt für Wiederaufbau or Deutsche Finanzierungsgesellschaft für Beteiligungen in Entwicklungsländern; when the interest income originates due to the loans secured by export loan guarantees (Hermes-Deckung) provided by the German government; when the interest income recipient is the government or the central bank, or when the interest income paid had originated due to a lending or a loan guaranteed or insured by state companies with a view to promoting export and is associated with the delivery of industrial, commercial, medical or scientific equipment (including Österreichische Kontrollbank Aktiengesellschaft). A 5% rate is applied when the recipient is the actual owner of the interest income. Otherwise, a 10% rate is applied.

(ff) A 3% rate is applied when the recipient is the actual owner of royalties in relation to the amounts paid for the use or cession of the right to use copyrights of scientific works, patents, trademarks, designs, models, plans, secret formulas or processes, or the right to use information on industrial, commercial or research experience. A 5% rate is applied when the recipient is the actual owner of royalties in relation to the amounts paid for the use or cession of the right to use copyrights of works of literature and art, including cinema films as well as films or recordings used in TV or radio programs, or for the use or cession of the right to use all types of equipment and transport vehicles. Otherwise, a 15% rate is applied.

(gg) A 0% rate is applied when the loan was approved by the government, when the interest income recipient is the government, local authorities or the central bank, or when the interest income paid had originated due to a lending or a loan guaranteed or insured by state companies with a view to promoting export and is associated with the delivery of industrial, commercial, medical or scientific equipment (including Österreichische Kontrollbank Aktiengesellschaft). A 5% rate is applied when the recipient is the actual owner of the interest income. Otherwise, a 10% rate is applied.

(hh) A 0% rate is applied when the interest income recipient is the government, the central bank, the Finnish Fund for
Industrial Cooperation (FINNFUND) or the Finnish export credit agency FINNVERA. A 5% rate is applied when the recipient is the actual owner of the interest income. Otherwise, a 10% rate is applied.

(ii) A 0% rate is applied when the income recipient is the government, the central bank or the State General Reserve Fund of the Sultanate of Oman and, in the event of interest income, any company that fully or largely belongs to the state. Otherwise, a 5% rate is applied.

(jj) A 5% rate is applied when the recipient is the actual owner of the income and owns at least 25% of the capital of the company paying the income. Otherwise, a 10% rate is applied.

(kk) A 0% rate is applied when the recipient is the actual owner of the interest income and when one of the following requirements is met:
- The interest income recipient is the government, a state body, the central bank, or a company that fully or largely belongs to the state
- Interest is paid on a government-guaranteed loan
- Interest is paid on a loan that is intended to promote export and that is connected with the delivery of all types of equipment and transport vehicles by an enterprise of another treaty state

(oo) A 0% rate is applied to dividends whose recipients are:
- The National Treasury Management Agency of Ireland
- The National Reserve Pension Fund of Ireland

A 5% rate is applied to dividends whose recipient owns at least 25% of the income-paying company’s capital. Otherwise, a 10% rate is applied.

(pp) A 0% rate is applied when the payer or the payee of the interest income is the government, a political and administrative division, a local government body, or the central bank. Otherwise, a higher rate is applied.

(qq) A 0% rate is applied when interest is paid to the government, the central bank, or institutions whose capital belongs fully to the state or local government bodies. Otherwise, a 10% rate is applied.

(rr) A 0% rate is applied in the following cases:
- The payer or the payee of the interest income is the government, a political and administrative division, a local government body, or the central bank
- A loan is approved by the government
- A loan is granted and guaranteed by the state financial body to promote export, if lending is provided.
or guaranteed on preferential terms

- A loan is granted by a bank to promote export
- Interest is paid on the debt that arises in the event of sale on credit terms of any items or industrial, business or scientific equipment.

A 5% rate is applied when the recipient is the actual owner of the interest income. Otherwise, a 10% rate is applied.

(ss) A 0% rate is applied when one of the following requirements is met:
- Interest is paid to the state, a local government body, the central bank, or a financial institution that fully belongs to the state
- Interest is paid on a loan that is guaranteed, insured or indirectly financed by the government, the local government body, the central bank, or a financial institution that fully belongs to the state.

Otherwise, a 10% rate is applied.

(tt) A 10% rate is applied when the recipient is the actual owner of royalty. Otherwise, a 15% rate is applied.

(uu) A 5% rate is applied when the recipient is the actual owner of royalty. Otherwise, a 15% rate is applied.

(vv) A 0% rate is applied when the recipient of the interest income is the government or local government body, the central bank or other government company or financial institution. Otherwise, a higher rate is applied.

 ww) A 10% rate is applied when the recipient is the actual owner of dividends. Otherwise, a 12% rate is applied.

(xx) A 5% rate is applied when the recipient is the actual owner of the interest income. Otherwise, a 10% rate is applied.

(yy) A 0% rate is applied in the following cases:
- The payer or the payee of the interest income is the government, a political and administrative division, a local government body, or the central bank
- A loan was approved by the government
- A loan was provided, guaranteed or insured by the government, the central bank or other body under state control
- A loan was provided or guaranteed by a financial institution to promote development, or interest is paid on a loan or lending designed to acquire industrial, business, commercial, medical or scientific equipment.

(zz) A 6% rate is applied when the recipient is the actual owner of royalty. Otherwise, a 15% rate is applied.

(aaa) A 5% rate is applied when the actual owner of dividends is a company that directly owns at least 20% of the capital of the company paying the dividends. A 10% rate is applied when the recipient is the actual owner of dividends. Otherwise, a 12% rate is applied.

(bbb) A 0% rate is applied when the actual owner of interest income is:
- In Belarus:
  (i) The Government of Belarus
  (ii) The National Bank of Belarus
  (iii) A Belarusian local government body.
- In Laos:
  (i) The Government of Laos
  (ii) The Bank of Laos
  (iii) A Laotian local government body.

A rate of 8% is applied when the recipient is the actual owner of interest income. Otherwise, a 10% rate is applied.

(ccc) A 0% rate is applied to dividends received by:
- In Belarus:
  (i) The Government of Belarus
  (ii) The National Bank
  (iii) A legal body
  (iv) Any institution wholly or predominantly owned by the Government of Belarus; a list of such institutions may be approved from time to time by the Government of Belarus, bodies authorized thereby and by a competent Singaporean body.
b) In Singapore:
   (i) The Government of Singapore
   (ii) The Monetary Authority of Singapore (Central Bank)
   (iii) The Government of Singapore Investment Corporation
   (iv) A legal body
   (v) Any institution wholly or predominantly owned by the Government of Singapore; a list of such institutions may be approved from time to time by the Government of Belarus, bodies authorized thereby, and by a competent Singaporean body.

A rate of 5% is applied to dividends received by the actual owner of the dividends. Otherwise, a rate of 12% is applied.

(ddd) A 0% rate is applied to interest received by:
   a) In Belarus:
      (i) The Government of Belarus
      (ii) The National Bank
      (iii) A legal body
      (iv) A bank
   (v) Any institution wholly or predominantly owned by the Government of Belarus; a list of such institutions may be approved from time to time by the Government of Belarus, bodies authorized thereby, and by a competent Singaporean body.
   b) In Singapore:
      (i) The Government of Singapore
      (ii) The Monetary Authority of Singapore (Central Bank)
      (iii) The Government of Singapore Investment Corporation
      (iv) A legal body
      (v) A bank
      (vi) Any institution wholly or predominantly owned by the Government of Singapore; a list of such institutions may be approved from time to time by a competent Singaporean body, the Government of Belarus or bodies authorized thereby.

A rate of 5% is applied to interest received by the actual owner of the interest income. Otherwise, a rate of 10% is applied.

(fff) A 0% rate is applied when the actual owner of interest income is:
   (i) The Government or a local government body
   (ii) The National (Central) Bank
   (iii) Financial organizations (institutions) that are wholly owned by the Government; a list of such organizations (institutions) may be approved from time to time by the governments of treaty states or bodies authorized thereby.

Otherwise, a 10% rate is applied.

(eee) A rate of 7.5% is applied when the actual owner of dividends is a company that directly owns at least 25% of the capital of the company paying the dividends. A rate of 10% is applied when the recipient is the actual owner of dividends. Otherwise, a rate of 12% is applied.
